Roy P. Stype, III, being duly sworn, deposes and states that he is a graduate Electrical Engineer, a qualified and experienced Communications Consulting Engineer whose works are a matter of record with the Federal Communications Commission and that he is a member of the Firm of "Carl E. Smith Consulting Engineers" located at 2324 North Cleveland-Massillon Road in the Township of Bath, County of Summit, State of Ohio, and that the Firm has been retained by Monterey Licenses, LLC to prepare the attached "Engineering Statement with Regard to Number of Stations In Market."

The deponent states that the Exhibit was prepared by him or under his direction and is true of his own knowledge, except as to statements made on information and belief and as to such statements, he believes them to be true.

## ENGINEERING STATEMENT

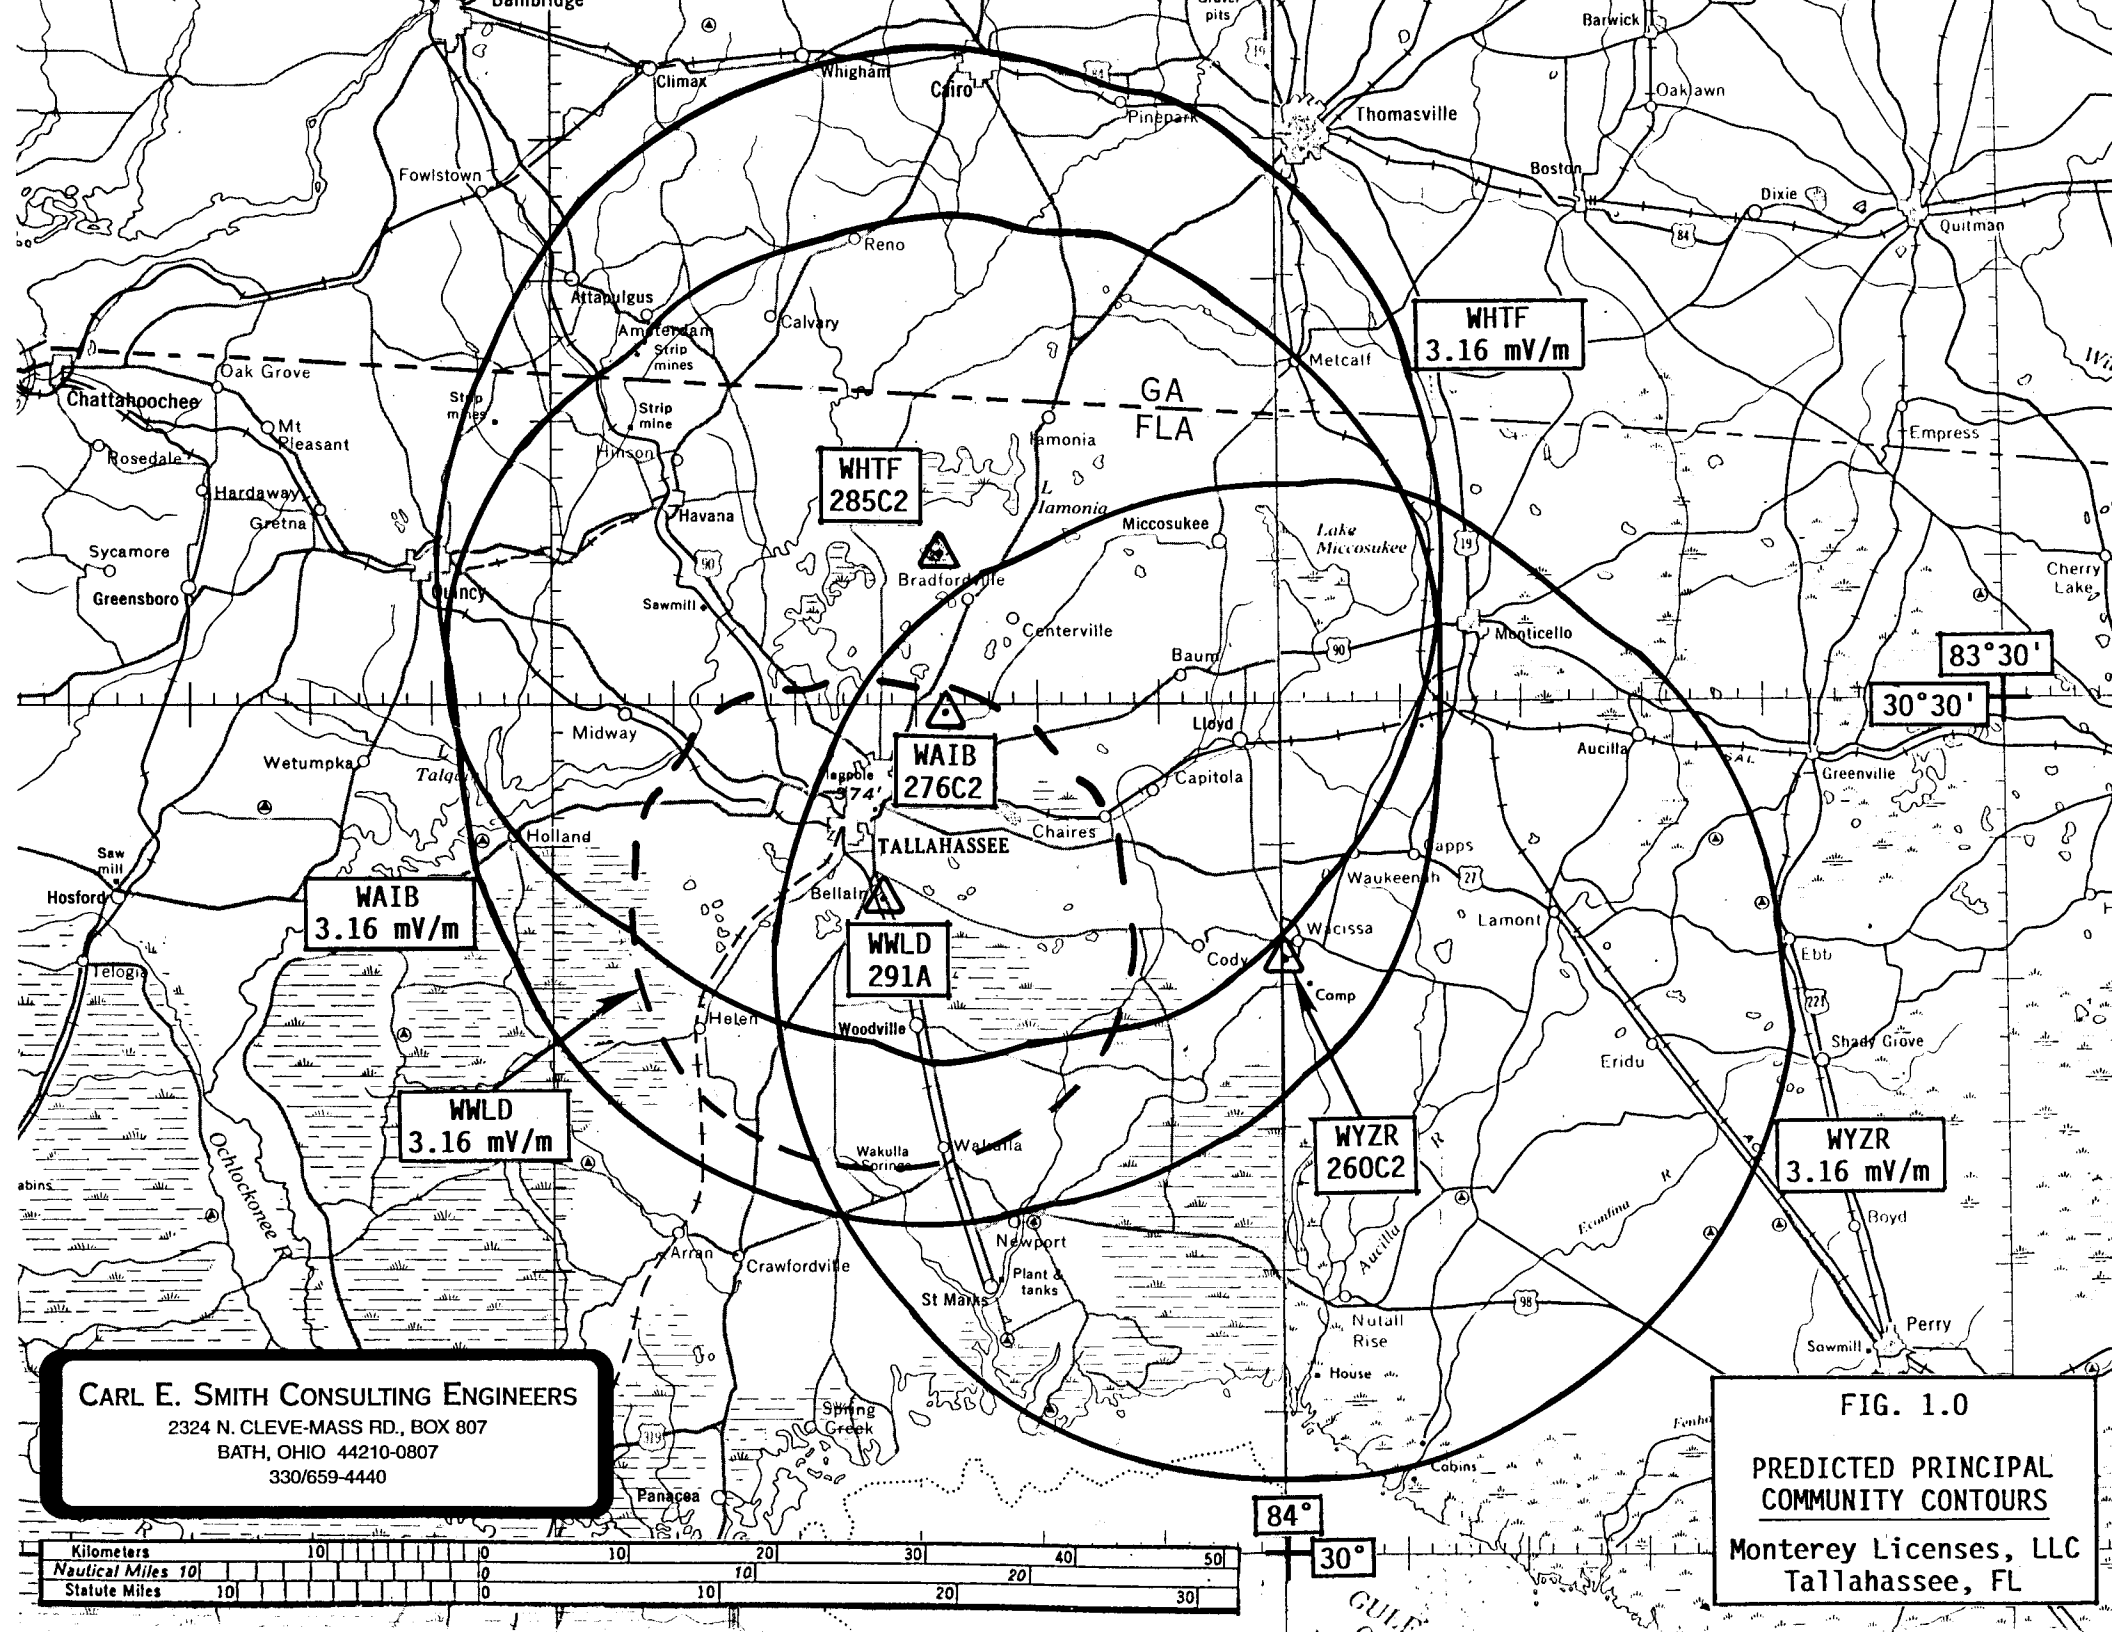

This engineering statement is prepared on behalf of Monterey Licenses, LLC , proposed assignee of Radio Station WWLD(FM) - Tallahassee, Florida. It documents that the common ownership of WWLD with WYZR(FM) - Lafayette, Florida; WAIB(FM) - Tallahassee, Florida; and WHTF(FM) - Havana, Florida complies with the multiple ownership restrictions outlined in Section 73.3555 of the FCC Rules.

Figure 1.0 is a map exhibit depicting the 3.16 mV/m principal community contours for each of these four stations. These contours were projected using the notified facilities for each station from the FCC's Consolidated Database System and terrain data extracted from the NGDC 30 second terrain database. As shown in this figure, the principal community contour for WWLD overlaps the principal community contours of WYZR, WAIB , and WHTF. It should be noted that the principal community contour for WWLD will not overlap the principal community contour of any other commonly owned station.

Figure 1.1 shows the composite principal community contour formed by these four stations. Also shown in this figure are the transmitter sites of all operating commercial stations located within this contour. Table 1.1 is a tabulation of the stations depicted in this figure. As shown by this data, there are 19 stations, including WYZR, WAIB, WHTF and WWLD whose transmitter sites lie within this contour. Since it is obvious that the principal community contour of any station whose site is located within this contour will overlap this contour, it can be safely said that there are at least 19 stations in the market defined by these four stations. In fact, this number would be even higher if stations located outside this composite contour but whose principal community contours overlap this contour were included. No such further analysis is necessary in this

case, however, since, in markets containing from 15 through 29 stations, Section 73.3555(a)(1)(iii) of the FCC Rules permits common ownership of up to 6 commercial stations, not more than 4 of which are in the same service. The instant situation involves the common ownership of four FM stations in this market, which does not exceed the permitted maximum.

Based upon the above information, the proposed acquisition of WWLD will fully comply with the multiple ownership restrictions outlined in Section 73.3555 of the FCC Rules.
