Mr. Bob Augsburg  
WAY-FM Media Group  
P.O. Box 64500  
Colorado Springs, CO 80962

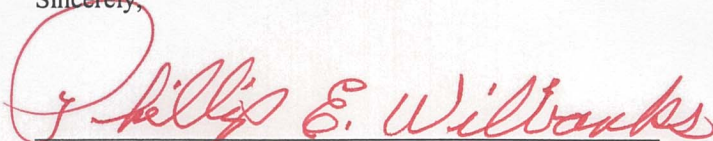

Dear Mr. Augsburg:

This letter is to inform you that I have performed a survey for the directional antenna of the WAYH Radio Antenna located on a tower on Capshaw Mountain in Madison County, Alabama.

This survey was carried out using TOPCON 6 SECOND equipment. The survey was conducted utilizing City of Huntsville GPS Control Monuments #8915 & 8913, NAD 1983 Datum.

The North Azimuth of the control I established for the directional antenna is approximately North 314 degrees. This Azimuth, in my opinion, can be relied on to be accurate to approximately  $\pm 1$  degree.

Sincerely,

PHILLIP E. WILBANKS, LS
