

**MURRAY COMMUNICATIONS
BRISTOL, TN CH 234 APPLICATION
BNPFT-20030317MRL
SHORT FORM MINOR AMENDMENTS**

This is a unilateral short form amendment by Murray Communications for its application BNPFT-20030317MRL at Bristol, TN eliminating the conflict with Wake Forest University application BNPFT-20030317FRQ by changing the channel to 287 (+53). This releases the Murray application from that mutually exclusive group.

There is no settlement agreement.

Other amendments include site, height, antenna and primary station (WRZK at Kingsport, TN (facility ID #47076).

An LPFM preclusion study is included as E1 demonstrating that the amended application will not conflict with any LPFM channel point in the Johnson City-Kingsport-Bristol, TN 30X30 grid.

Allocation discussion:

All exhibits utilize the FCC 30 second terrain database.

- E1 Channel study
- E1A Interference plot to Holston Valley amended application BNPFT-20030317LHO
- E1B Aerial photograph of interference area
- E2 60 dBu contours
- E3 ASR-NADCON-Antenna vertical elevation tabulation

A channel study is included as E1 demonstrating compliance with §74.1204 with the exception of 2nd adjacent channel translator application BNPFT-20030317LHO on channel 289 at Bristol, TN as recently amended. A plot of the proposed 60 dBu contour is provided as E2 showing that it is entirely contained within primary station WRZK's 60 dBu and that it overlaps the short form 60 dBu.

The amended Holston Valley 289D APP does not cause any interference to this application. However, the proposed facility will be located inside the protected contour of Holston Valley's 2nd adjacent channel application BNPFT-20030317LHO. Since co-pending translator applications may not cause interference to each other, an interference

Anderson Associates

analysis has been conducted based on the U/D ratio of +40 dB at the proposed site. The Holston Valley 289D APP (50:50) contour at the proposed site is 71.62 dBu and the (50:10) interference contour is 111.62 dBu at a distance of 291 meters. That yields a depression angle of 17 degrees reducing the ERP to 0.136 kW and the interference contour to 214.7 meters based on the PSI FML-2 0.75 wavelength spaced antenna's F factor of 0.738. This contour has been further evaluated at every five degrees of depression angle from 17 through 90 degrees using the vertical elevation pattern to determine the vertical clearance from the contour to ground.

Depression Angle (Deg.)	F	ERP X F² kW	Int. = 111.62 dBu meters	Vertical Clearance AGL (m) (Int X sin Ang - 89 m)
17	0.738	0.136	214.7	26.2
20	0.650	0.1056	189.2	24.3
25	0.493	0.061	143.8	28.2
30	0.331	0.0274	96.4	40.8
35	0.178	0.008	52.1	59.1
40	0.043	0.0005	13.0	80.6
45	0.068	0.0012	20.2	74.7
50	0.149	0.006	45.1	54.5
55	0.202	0.0105	59.6	40.2
60	0.227	0.015	71.3	27.3
65	0.226	0.013	66.4	28.8
70	0.205	0.0105	59.6	33.0
75	0.168	0.007	48.7	42.0
80	0.118	0.0035	34.4	55.1
85	0.061	0.0009	17.5	71.6
90	0.001	0.000	00.0	89.0

Based on the fact that the interference contour clears ground level by at least 24.3 meters and the fact that there are no buildings within the contour greater than two stories (6 meters) (see E1B showing only single and two story dwellings) as confirmed by a careful examination of the aerial photograph in exhibit E1B and Google Earth, it is clear that the interference contour will not reach any populated area or major highways. Based on this showing, a waiver of Section 74.1204 is requested in accordance with *Living Way Ministries, Inc.* (FCC 08-242).

RF Exposure Calculation:

The proposed facility will utilize a PSI two bay 0.75 wavelength spaced circularly polarized antenna with a center of radiation at 89 meters AGL on existing tower ASR#1053535. The RF contribution of the proposed translator was calculated using FMMODEL assuming a worst case ring-stub design to be 0.65 μ Watts/cm² or 0.33% of the maximum permissible 200 microwatts/cm² exposure for general population/uncontrolled exposure, and well below the 5% of that limit which requires consideration. The proposed translator clearly complies with Commission RF radiation limits.
