

## CONTOUR RELATIONSHIP BETWEEN K278CF PERMIT (W278BW) AND WOAD 1300 AM

**FIGURE 1:** F(50,50) 60 dBu contour relationship between the K278CF Construction Permit (W278BW, Facility ID 155142) at Jackson, Mississippi, in green, and the 2.0 mV/m daytime AM contour of WOAD 1300 AM (Facility ID 50404) at Jackson, MS, in red. As shown above, the permitted K278CF translator will not extend the WOAD 2.0 mV/m service area, nor will it extend the WOAD's signal beyond 25 miles. As such, the K278CF construction permit authorization is eligible to be classified as a 'fill-in' translator, with WOAD as its parent facility. Until the K278CF authorization has been activated, however, the licensed K278CF facility will continue to broadcast its current parent station, KSBW 92.7 FM (Facility ID 183340).
