3/13/2012

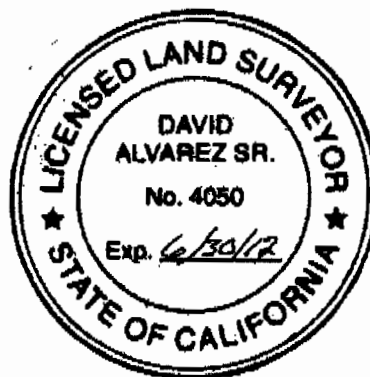

Lloyd M. Moss
Corporate Chief Engineer

Dear Lloyd:

This letter will serve as a certification regarding the antenna installation for which we gave you the bearing of N55W.

I, David Alvarez, Sr., Professional Land Surveyor #4050, registered in the State of California, hereby certify that on March 13, 2012, I directed a survey to check the alignment of a radio antenna at a communication site located on Mt Thayer in Morgan Hill, CA. We found the bearing of the antenna to be N55W or an azimuth of 305°.

David Alvarez, Sr. PLS 4050
