

K265FH Special Operating Conditions Exhibit

Access to the K265FH transmitter site on Edom Hill is restricted. According to information provided by the licensee's local engineer, there is a large gate halfway up the hill which is kept locked and which is posted with RF warning signs. The site is not open to the public.

Additionally, the K265FH tower site itself is surrounded by a fence having a locked gate and topped with barbed wire. RF warning signs have been posted on this fence, as can be seen in the accompanying photos.
