

STATEMENT OF INSTALLATION ENGINEER

I, **Billy J. "Buddy" Wommack**, Chief Engineer of WSEA-FM, do hereby certify the following:

That I have been actively engaged in broadcast engineering since 1977, and was certified by the SBE as a Senior Broadcast Engineer, on January 1, 1990. I have also have been responsible for the construction of several transmitter facilities.

I referenced a set of mounting instructions provided by Dielectric, the antenna manufacturer and supervised the installation for WSEA, Atlantic Beach, South Carolina, F.C.C. File Number BPH-20010806AAB. A detailed inspection determined that the antenna was installed exactly according to the manufacturer's instructions. In addition, I inspected the installations to verify the following: 1) that no platforms on the structure are larger than the nominal cross sectional area of the tower in the antenna horizontal plane, 2) no additional antennae are located within the area of the antenna, vertical or horizontal, and 3) the tower and all cables, steps etc., are properly grounded.

Upon a complete and thorough examination, I can conclude that this directional antenna has been installed exactly as specified by the mounting instructions from Dielectric.

Billy J. Wommack
