Subject: 97.3 Interference

Message Body:

Good morning this is Scott Kramer, General manager of KRWW-FM in Gold canyon, AZ. I am sure you have received numerous calls if you have been answering your phone. We are attempting to contact an engineer, station manager etc. to find out when the interference from the 97.3 audio transmission will be repaired. 99.1 and 99.3 are being interfered by 97.3 FM KIKO's translator. Feel free to reach out at 602-625-3000. I wanted to contact you prior to reaching out to the FCC and filing a complaint and providing our listener e-mails we have been compiling for the past 7 days or so. These things happen when you have new-installs so I am sure your engineer is on top of this and probably awaiting a part or something? No sure but the interference must stop obviously. My chief engineer who also works for Bonneville International in Phoenix KKFR/KTAR also is aware of the interference. I am keeping him apprised.

I am sure you're working on this but please contact me to assure me that the interference will be fixed very soon.

Thank you,  
Scott Kramer  
Station Manager  
KRWV-FM 99.3 Gold Canyon  
602-625-3000 (cell)

Message Body:

Do you know when you will have your transmitter fixed on 97.3 so it does not interfere with 99.3 FM? This has been happening for nearly a week now. I called the radio station in Phoenix and they are aware of the problem your station is causing and said they were filing a complaint with the FCC. You can hear 97.3 on 99.3 which interferes with the sports station on 99.3 in Mesa.

Hope soon this will be fixed.
