October 13, 2009,

In evaluating the proposed digital flash cut for K44FH FID 5006, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The station listed in the table below showed possible interference. When this station was evaluated for outgoing interference, there was zero percent interference found when rounded to the nearest whole percent. Better life Television Inc. respectfully requests to Digitally Flash-cut K44FH on channel 44.
