

EXHIBIT
CONSTRUCTED FACILITY

The Box Worldwide LLC notes that it began operating the displacement facilities authorized by the construction permit underlying this application for license to cover on June 22, 2001. However, The Box did not file an application for license to cover due to confusion about the Class A authorization granted to WBXN-CA on May 23, 2001, which was entitled "Class A Television Broadcast Station License." During a recent review of its files for the station, The Box discovered that it should have filed an application for a license to cover its displacement facilities. The Box herein requests such license.
