

Multiple Ownership Report

Radio and Television Stations Attributable to Dana R. Withers

Dana R. Withers, individually and through Dana Communications, Inc., presently has a cognizable interest in seven radio stations. W. Russell Withers, Jr., Ms. Withers' late father, individually and through various companies, was attributable on 32 additional radio stations and three television stations. He bequeathed all of his stations to her.

This report is the result of a study of all the properties to determine whether Ms. Withers can hold all 39 radio and three television stations under the constraints of the FCC's Multiple Ownership rule, §73.3555.

Only one of the 39 radio stations, a standalone FM in West Virginia, is in a Nielsen metro market.

The remaining 38 radio stations were studied using the contour overlap methodology. Seven stations involved in two isolated groups were studied as clusters. The remaining 31 stations were broken down into geographically based clusters. The report is organized as follows:

- 1) Station Inventory
- 2) Television, with WETT (FM)
- 3) Radio (38 properties)
- 4) Summary

Throughout this report, "overlap" refers to contour overlap among the 70 dBu f(50,50) contours of FM stations and AM the 5 mV/m daytime contours of AM stations. In clusters with multiple overlaps, the most concentrated overlap areas were identified by shading and studied individually.

All FM contours were generated using 3-second USGS03 terrain data.

Tables are provided listing non-attributable stations. For each such station, the attributable stations overlapping the non-attributable station are shown.

Television, with WETT (FM)

Two markets including three television stations and one FM station are involved:

- WETT (FM), WVFX (TV) and WDTV (DT) in Clarksburg, WV
- WDHS (DT) in Iron Mountain, MI

Clarksburg, WV:

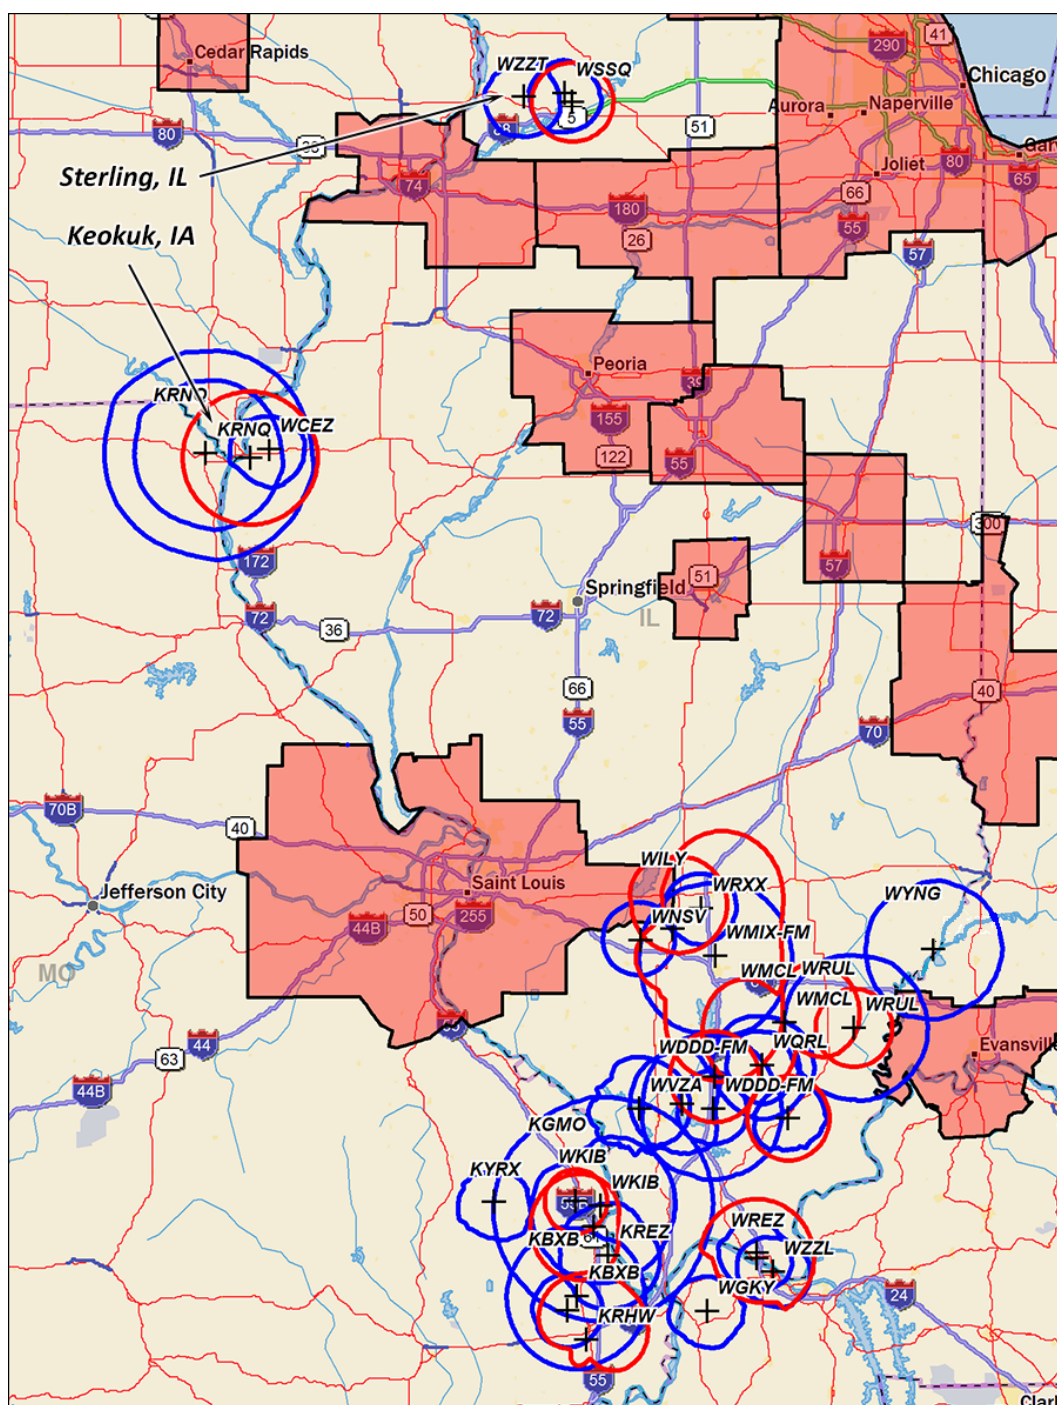

WVFX(TV) was acquired by Mr. Withers in 2008 pursuant to a failing station waiver (see BALCT - 20070622ABZ). At that time, Mr. Withers already owned WETT(FM) and WDTV(DT). Common ownership of two television stations was allowed under the failing station waiver and the TV/FM combination is permissible under §73.3555(c)(2). The assignment of this combination to Mr. Withers' daughter, is permissible under Note 4 to § 73.3555 which states: " Paragraphs (a) through (d) of this section will not be applied so as to require divestiture, by any licensee, of existing facilities, and will not apply to applications for assignment of license or transfer of control filed in accordance with §73.3540(f) or §73.3541(b), or to *applications for assignment of license or transfer of control to heirs or legatees by will or intestacy, if no new or increased concentration of ownership would be created among commonly owned, operated or controlled media properties.*" (emphasis added).

Iron Mountain, MI:

This television station is standalone, with no attributable broadcast properties within hundreds of kilometers.

Therefore, the acquisition of this station is acceptable.

38 Radio Stations

The 38 additional radio stations are grouped as shown above, with three in Sterling, four in Keokuk, and 31 in intertwined groups that are analyzed below.

Sterling, IL

This cluster consists of two attributable FMs (blue) and one attributable AM (red):

The attributable stations are WSDR (AM), WSSQ (FM), and WZZT (FM), creating one overlap market.

A total of 15 non-attributable stations overlap one or more of the attributable stations:

WIXN	AM	21201	IL	DIXON	NON-ATTRIBUTABLE - WSDR WSSQ WZZT
KCLN	AM	33055	IA	CLINTON	NON-ATTRIBUTABLE - WZZT
KROS	AM	35557	IA	CLINTON	NON-ATTRIBUTABLE - WZZT
KUUL	FM	43208	IL	EAST MOLINE	NON-ATTRIBUTABLE - WZZT
WPRC	FM	173264	IL	SHEFFIELD	NON-ATTRIBUTABLE - WSDR WSSQ WZZT
WCCI	FM	9119	IL	SAVANNA	NON-ATTRIBUTABLE - WZZT
KMXG	FM	60359	IA	CLINTON	NON-ATTRIBUTABLE - WSDR WSSQ WZZT
KCQQ	FM	32987	IA	DAVENPORT	NON-ATTRIBUTABLE - WSDR WSSQ WZZT
WRCV	FM	21203	IL	DIXON	NON-ATTRIBUTABLE - WSDR WSSQ
WLLR-FM	FM	60361	IA	DAVENPORT	NON-ATTRIBUTABLE - WZZT
WDLN-FM	FM	43691	IL	EAST MOLINE	NON-ATTRIBUTABLE - WZZT
WNIQ	FM	49557	IL	STERLING	NON-ATTRIBUTABLE - WSDR WSSQ WZZT
WLLT	FM	59235	IL	POLO	NON-ATTRIBUTABLE - WSDR WSSQ WZZT
WVIK	FM	3242	IL	ROCK ISLAND	NON-ATTRIBUTABLE - WZZT
KMCN	FM	33054	IA	CLINTON	NON-ATTRIBUTABLE - WZZT

The market size is 18, and the limit is six stations with four in one service.

The proposed common attribution of one AM and two FMs is acceptable.

Keokuk, IA

This market consists of three attributable FMs and one attributable AM.

The attributable stations are KOKX (AM), KOKX-FM, KRNO (FM) and WCEZ (FM).

Three stations with two in one service is acceptable in any size market, provided that they do not amount to more than 50% of the stations in the market. As shown on the table on the following page, a total of 31 non-attributable stations overlap KOKX. The three attributable stations do not come close to 50% of the market, and the combination is acceptable.

Cape Girardeau - Sikeston, MO

This cluster consists of four attributable AMs and eleven attributable FM stations in a total of seven overlap markets.

The attributable AM stations are KAPE, KJXX, KRHW, and WMOK. The attributable FM stations are KBHI, KBXB, KGMO, KREZ, WDDD-FM, WHET, WKIB, WTAO-FM, and WVZA.

As shown on the table below, KGMO, which is common to all seven markets, overlaps 39 non-attributable stations.

Market 1 consists of four FM stations: KGMO, WVZA, WTAO-FM, and WDDD-FM. 15 overlapping non-attributable stations would be sufficient to allow for this level of concentration, and the KGMO overlaps alone suffice.

Market 2 consists of three FM stations: KGMO, WKIB, and WVZA. This level of concentration is acceptable in any size market, as long as the three stations do not exceed 50% of the market. With its large number of non-attributable overlaps, KGMO assures that the three stations do not come close to this limit.

Market 3 consists of two FM stations: KGMO and KJXX. This level of concentration is acceptable in any size market, as long as the three stations do not exceed 50% of the market. With its large number of non-attributable overlaps, KGMO assures that the three stations do not come close to this limit.

Skywaves Consulting LLC

PO Box 4, Millbury, MA 01527

Copyright © 2015. All rights reserved.

Market 4 consists of AM stations KAPE and KJXX and FM stations KGMO, WKIB, KREZ, and KBXB, a total of six stations with four in one service. A total market size of 15 overlapping non-attributable stations would be sufficient to allow for this level of concentration, and the KGMO overlaps alone suffice.

Market 5 consists of AM stations KAPE and KRHW, and FM stations KGMO, WKIB, WBXB, and KBHI, a total of six stations with four in one service. 15 overlapping non-attributable stations would be sufficient to allow for this level of concentration, and the KGMO overlaps alone suffice.

Market 6 consists of WMOK (AM) and KGMO (FM). An AM/FM pair is acceptable.

Market 7 is a very small overlap area (less than 0.6 km²) consisting of five FMs: KGMO, WVZA, WTAO-FM, WDDD-FM, and WHET. A market size of 45 stations would be sufficient to allow for this level of concentration. KGMO overlaps 39 non-attributable stations, and WDDD-FM overlaps six additional non-attributable stations not overlapped by KGMO. The total is at least 45 non-attributable stations, the total market size is at least 51 stations, and the common attribution of these stations is acceptable.

Each of the markets is acceptable, and the proposed common attribution of these stations is acceptable.

Paducah, KY

This cluster consists of one AM and three local FM's. Since KGMO overlaps one of the stations in the cluster, and its transmitter is within 92 km, it is included in the cluster. This brings the total to four FM's and one AM. Due to its distance from the market, reliance was not placed on stations solely overlapping KGMO.

Three markets are created.

Market 1 consists of WMCK (AM) and KGMO (FM). A two-station AM/FM combination is acceptable.

Market 2 consists of WMOK (AM), and FM stations WREZ and WZZL. Three stations with two in one service is acceptable as long as they don't exceed 50% of the market. As shown in the table on the following page, WREZ overlaps 16 other stations, making it clear that the combination of three stations does not come close to 50% of the market.

Market 3 consists of WMCK (AM) and WGKY (FM). A two-station AM/FM combination is acceptable.

The KGMO and WGKY contours are close, but they do not overlap.

Each of the markets is acceptable, and the proposed common attribution of these stations is acceptable.

Mount Carmel, IL

This combination consists of two FM stations:

The stations are WYNG and WRUL. Their overlap creates one market. Two stations in one service are acceptable as long as they do not exceed 50% of the market. As shown in the table on the following page, WYNG overlaps 26 other stations, making it clear that the combination of two stations does not come close to 50% of the market.

The proposed common attribution of these stations is acceptable.

Carmi, IL

This cluster consists of three AMs and four FM stations creating a total of five markets:

The AM stations are WROY, WMCL, and WEBQ. The FM stations are WRUL, WYNG, WQRL, and WISH-FM.

Market 1 is identical to Mount Carmel Market 2, above. This is an acceptable combination.

Market 2 consists of AM stations WROY and WMCL and FM station WRUL. This level of concentration is acceptable in any size market, provided that the three stations do not constitute more than 50% of the market. As shown in the table on the following page, WRUL alone overlaps 19 non-attributable stations, and the combination is acceptable.

Market 3 consists of AM station WMCL and FM stations WRUL, WQRL, and WISH-FM, a total of four stations with three in one service. A market size of 15 or more allows for this combination. Since WRUL alone overlaps 19 non-attributable stations the combination is acceptable.

Market 4 consists of AM stations WMCL and WEBQ and FM stations WQRL and WISH-FM, four stations with two in each service. This level of concentration is acceptable in any size market, provided that the three stations do not constitute more than 50% of the market. As shown in the table on the next page, WMCL alone overlaps nine non-attributable stations, and the combination is acceptable.

Market 5 consists of AM station WEBQ and FM station WRUL. A two-station AM/FM combination is always acceptable.

All five markets are acceptable, and common attribution of these stations is acceptable.

Harrisburg, IL

This cluster consists of three AMs and five FM stations creating a total of four overlap markets:

The AM stations are WEBQ, WRRX, and WMCL. The FM stations are WEBQ-FM, WDDD-FM, WQRL, WISH-FM, and WRUL.

Market 1 consists of AM stations WEBQ and WMCL, and FM stations WEBQ-FM, WDDD-FM, WQRL, and WISH-FM. With six stations and four in one service, a market size of at least 15 stations is required. WDDD-FM alone overlaps 21 non-attributable stations, and the combination is acceptable.

Market 2 consists of AM stations WFRX and WEBQ, and FM stations WDDD-FM, WISH-FM, and WQRL, five stations with three in one service. This combination would be acceptable in a market of any size, provided that the five stations do not constitute 50% of the market. As pointed out above, WDDD-FM overlaps 21 non-attributable stations. The attributable stations are therefore much less than 50% of the market, and the combination is acceptable.

Market 3 consists of AM station WEBQ, and FM stations WEBQ-FM, WDDD-FM, WISH-FM, and WQRL. With five stations and four in one service, a market size of at least 15 stations is required. WDDD-FM alone overlaps 21 non-attributable stations, and the combination is acceptable.

Market 4 consists of WEBQ (AM) and WRUL (FM). A two-station AM/FM combination is acceptable.

All five markets are acceptable, and common attribution of this group of stations is acceptable.

Mount Vernon, Centralia, and Nashville, IL

This market complex is predominantly defined by WMIX (AM). It consists of four attributable AMs and eight attributable FM stations forming six overlap markets.

The cluster consists of AM stations WMIX, WFRX, WILY, and WMCL, and FM stations WMIX-FM, WDDD-FM, WHET, WISH-FM, WNSV, WRXX, WTAO-FM, and WQRL.

Market 1 includes AM stations WMIX and WILY, and FM stations WMIX-FM, WNSV, and WRXX, a total of two AMs and three FMs. This combination of five stations with three in one service is acceptable in a market of any size provided that the five stations do not constitute 50% of the market. As pointed out above, WMIX (AM) overlaps 25 non-attributable stations. The attributable stations are therefore much less than 50% of the market, and the combination is acceptable.

Market 2 includes AM stations WMIX and WFRX, and FM stations WDDD-FM, WTAO-FM, WHET, and WQRL, a total of two AMs and three FMs. This combination of five stations with three in one service is acceptable in a market of any size provided that the five stations do not constitute 50% of the market. As pointed out above, WMIX (AM) overlaps 25 non-attributable stations. The attributable stations are therefore much less than 50% of the market, and the combination is acceptable.

Market 3 consists of AM stations WMIX, WMCL, and WFRX, and FM stations WDDD-FM, WISH-FM, WQRL, and WHET. With seven stations and four in one service, a market size of 30 is required. As pointed out above, WDDD-FM overlaps 21 non-attributable stations. WMIX (AM) overlaps an additional 17 non-attributable stations that are not also overlapped by WDDD-FM, bringing the market size to well over 30.

Market 4 consists of a small overlap area between WMIX-FM and WDDD-FM that falls within the contours of AM stations WMIX, WMCL, and WFRX. This combination of five stations with three in one service is acceptable in a market of any size provided that the five stations do not constitute 50% of the market. As pointed out above, WMIX (AM) overlaps 25 non-attributable stations. The attributable stations are therefore much less than 50% of the market, and the combination is acceptable.

Market 5 includes AM stations WMIX, WMCL, and WFRX, and FM stations WMIX-FM and WQRL. This combination of five stations with three in one service is acceptable in a market of any size provided that the five stations do not constitute 50% of the market. As pointed out above, WMIX (AM) overlaps 25 non-attributable stations. The attributable stations are therefore much less than 50% of the market, and the combination is acceptable.

Each of the markets is acceptable, and common attribution of the cluster is acceptable.

Benton / McLeansboro, IL

This cluster consists of five AM stations and eight FM stations forming nine overlap markets.

The AM stations are WMCL, WEBQ, WFRX, WMIK, and WROX. The FM stations are WQRL, WDDD-FM, WEBQ-FM, WHET, WISH-FM, WMIK-FM, WRUL, and WTAO-FM.

Market 1 is identical to Market 5 analyzed in the Mount Vernon section above. It is acceptable.

Market 2 is identical to Market 4 analyzed in the Mount Vernon section above. It is acceptable.

Market 3 is identical to Market 3 analyzed in the Mount Vernon section above. It is acceptable.

Market 4 identical to Market 2 analyzed in the Mount Vernon section above. It is acceptable.

Market 5 includes AM stations WEBQ and WFRX, and FM stations WDDD-FM, WISH-FM, and WQRL. Five stations and three in one service is an acceptable combination in any size market, as long as the combination does not amount to more than 50% of the stations in the market. As shown in the table below, WDDD-FM alone overlaps 21 non-attributable stations, the five stations are significantly less than 50% of the overall market, and the combination is acceptable.

Market 6 includes AM station WEBQ and FM stations WQRL-FM, WDDD-FM, and WISH-FM. Four stations with three in one service is acceptable in any size market, provided that they do not amount to more than 50% of the stations in the market. As shown in the table below, WDDD-FM alone overlaps 21 non-attributable stations, and the combination is acceptable.

Market 7 includes WEBQ (AM) and WRUL (FM). The WQRL contour is close, but does not intersect the overlap area. A two-station AM/FM combination is always acceptable.

Market 8 includes WMCL (AM), and FM stations WISH-FM, WQRL, and WRUL. Four stations with three in one service is acceptable in any size market, provided that they do not amount to more than 50% of the stations in the market. As shown in the table below, WMCL alone overlaps 12 non-attributable stations, and the four-station combination is acceptable.

Market 9 consists of AM stations WROY and WMCL and FM station WRUL. Three stations with two in one service is acceptable in any size market, provided that they do not amount to more than 50% of the stations in the market. Again, WMCL alone overlaps 12 non-attributable stations, and the three-station combination is acceptable.

The following 60 non-attributable stations overlap one or more of the attributable stations in the market:

Marion / Carbondale, IL

This cluster falls between Cape Girardeau to the southwest and other previously analyzed markets to the north, northeast, and east. It includes only one overlap market that was not analyzed in the markets above.

The market includes one AM station, WFRX, and four FM stations, WVZA, WTAO-FM, WDDD-FM, and WHET. Five stations with four in one service requires a market size of at least 15 stations. As described above, WDDD-FM alone overlaps 21 non-attributable stations, bringing the market size to at least 26. This combination is acceptable.

Conclusion

Analysis was performed on all 40 radio and three television stations. Acquisition by Ms. Withers of Mr. Withers holdings comports with the requirements of §73.3555, and is therefore acceptable.
