ENGINEERING TECHNICAL STATEMENT PREPARED BY WILLIAM T. GODFREY, JR. OF THE FIRM KESSLER AND GEHMAN ASSOCIATES, INC., TELECOMMUNICATIONS CONSULTING ENGINEERS IN CONNECTION WITH A MINOR CHANGE IN LICENSED FACILITY APPLICATION (BLET-20071109AAX) REQUESTING AUTHORIZATION TO OPERATE THE GEORGIA PUBLIC TELECOMMUNICATIONS COMMISSION DIGITAL TELEVISION BROADCAST FACILITY, WGTV-DT CHANNEL 8, ON ITS FINAL POST-TRANSITION DIGITAL CHANNEL AS ADOPTED IN THE FINAL DTV TABLE OF ALLOTMENTS.

The firm Kessler and Gehman Associates, Inc. has been retained by the Georgia Public Telecommunications Commission (GPTC), Atlanta, GA to prepare engineering studies and the engineering portion of a minor change in licensed facility application (BLET-20071109AAX) requesting authorization to operate the WGTV-DT facility on its final post-transition digital channel as adopted in the Report and Order in MB Docket No. 07-91, FCC 07-228 *In the Matter of Third Periodic Review of the Commission's Rules and Policies Affecting the Conversion to Digital Television*, Released on December 31, 2007 (R&O). This application also requests authorization to operate the final WGTV-DT Channel 8 post-transition DTV facility with an Effective Radiated Power (ERP), antenna azimuth pattern and antenna height radiation center that deviate slightly from the final DTV Table of Allotments (DTV TOA) adopted in the R&O.

Discussion

The final DTV TOA assigns digital Channel 8 as the WGTV-DT post-transition digital channel. It also assigns the following parameters for the WGTV-DT Channel 8 post-transition facility: 1) an antenna radiation center Height Above Average Terrain (HAAT) of 326 m; 2) antenna ID number 80225; and 3) an Effective Radiated Power (ERP) of 15.9 kW. GPTC filed an FCC Form 387 DTV Transition Report in February 2008 informing the FCC that it planned to request minor changes from the station's final DTV allotment in its construction permit application for post-transition DTV facilities.

GPTC currently operates its analog television broadcast facility, WGTV-TV, on Channel 8 with a Dielectric model TW-12B8-R SP nondirectional antenna mounted on the top of the MAET-owned tower (ASRN: 1018776) at 330 m AAT. GPTC plans to use the existing antenna and transmission line for the WGTV-DT Channel 8 post-transition DTV facility.

Referring to Exhibit 8, it can be seen that the proposed WGTV-DT Channel 8 post-transition facility's F(50,90) 36.0 dBuV/m noise limited contour (dashed red), resulting from an antenna radiation center HAAT of 330.0 m, an ERP of 14.1 kW and a nondirectional antenna, closely matches the F(50,90) 36.0 dBuV/m noise limited contour, resulting from the parameters adopted in the Final DTV TOA (green). The F(50,90) 36.0 dBuV/m noise limited contour, resulting from the parameters adopted in the Final DTV TOA (green), completely encompass the proposed WGTV-DT Channel 8 post-transition facility's F(50,90) 36.0 dBuV/m noise limited contour (dashed red) in all azimuthal directions.

Expedited Processing

Exhibit 8 demonstrates that the WGTV-DT Channel 8 Final DTV TOA facility's F(50,90) 36.0 dBuV/m noise limited contour (green) completely encompasses the proposed WGTV-DT Channel 8 facility's F(50,90) 36.0 dBuV/m noise limited contour (dashed red). Exhibit 9 is a distance to contour tabulation of the WGTV-DT Channel 8 Final DTV TOA facility. This exhibit depicts the distance, in kilometers, from the transmitter to the WGTV-DT Final DTV TOA facility's noise limited contour in all azimuthal directions. Exhibit 10 is a distance to contour tabulation of the proposed WGTV-DT Channel 8 facility. This exhibit depicts the distance, in kilometers, from the transmitter to the proposed WGTV-DT noise limited contour in all azimuthal directions. Exhibit 11 is a distance to contour comparison spreadsheet which compares the distance from the transmitter to the noise limited contour of the WGTV-DT Final DTV TOA facility (Exhibit 9) and the proposed facility (Exhibit 10). Column four in Exhibit 11 depicts "PASS" if the proposed distance to contour values are less than or equal to the Final DTV TOA distance to contour values or "FAIL" if the proposed distance to contour values are

greater than the Final DTV TOA distance to contour values. Exhibit 11 demonstrates that the Final DTV TOA facility's distance to contour values are greater than or equal to the proposed distance to contour values in all azimuthal directions. Therefore, the proposed facility will not expand the noise limited service contour in any direction beyond that established in Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. Section 73.622(i) ("new DTV Table Appendix B".)

Exhibit 12 is a contour map depicting the WGT-TV-DT Final DTV TOA facility's F(50,90) 36.0 dBuV/m noise limited contour (green) and the predicted population within that contour based on U.S. Census 2000 data. The population within the WGT-TV-DT Final DTV TOA facility's F(50,90) 36.0 dBuV/m noise limited contour (green) is predicted to be 4,681,013. The map also depicts the Proposed WGT-TV-DT facility's F(50,90) 36.0 dBuV/m noise limited contour (dashed red) and the predicted population within that contour based on U.S. Census 2000 data. The population within the Proposed facility's F(50,90) 36.0 dBuV/m noise limited contour (dashed red) is predicted to be 4,677,273 persons. Therefore, the proposed WGT-TV-DT facility is predicted to serve 3,740 persons less (4,681,013-4,677,273) than the WGT-TV-DT Final DTV TOA facility which equates to a predicted 0.08% population reduction (3,740/4,681,013) which is well below the 5.0% reduction threshold to qualify for expedited processing.

Accordingly, GPTC respectfully requests expedited processing pursuant to §V.D.1. (¶140) of the R&O. This application meets all three of the following conditions required to qualify for expedited processing:

- (1) This application does not seek to expand the station's facilities beyond its final post-transition DTV Table Appendix B facilities;
- (2) This application specifies facilities that match or closely approximate the DTV Table Appendix B facilities (*i.e.*, if the station is unable to build precisely the facilities specified in the new DTV Table Appendix B, then it must apply for facilities that are

no more than five percent smaller than its facility specified in Appendix B facilities with respect to predicted population); and

- (3) This application was filed within 45 days of the effective date of the Report and Order.

Exhibits

Exhibits 1 and 2 represent WGTV's administration data, antenna and antenna structure specifications.

Exhibit 3 depicts the profile view of the proposed antenna on the antenna structure with all the appropriate elevations.

Exhibits 4 (11 deg) and 5 (90 deg) display the elevation pattern and Exhibit 6 displays the elevation pattern tabulation.

Exhibit 7 depicts the location of the WGTV-DT site on a 7.5-Minute (Series) Topographic map.

Exhibit 8 is an FCC coverage contour map depicting the WGTV-DT Channel 8 Final DTV TOA facility's F(50,90) 36.0 dBuV/m noise limited contour (green) and the proposed WGTV-DT Channel 8 facility's F(50,90) 36.0 dBuV/m noise limited contour (dashed red).

Exhibit 9 is a distance to contour tabulation of the WGTV-DT Final DTV TOA facility. This exhibit depicts the distance, in kilometers, from the transmitter to the authorized WGTV-DT Final DTV TOA noise limited contour in all azimuthal directions.

Exhibit 10 is a distance to contour tabulation of the proposed WGTV-DT facility. This exhibit depicts the distance, in kilometers, from the transmitter to the proposed WGTV-DT noise limited contour in all azimuthal directions.

Exhibit 11 is a distance to contour comparison tabulation spreadsheet between the WGTV-DT Final DTV TOA facility and the proposed WGTV-DT facility. The chart demonstrates that the Final DTV TOA facility's distance to contour values are greater than or equal to the proposed WGTV-DT facility's distance to contour values in all azimuthal directions.

Exhibit 12 is a contour map depicting the WGTV-DT Final DTV TOA facility's F(50,90) 36.0 dBuV/m noise limited contour (green) and the predicted population within that contour based on U.S. Census 2000 data. The map also depicts the Proposed WGTV-DT facility's F(50,90) 36.0 dBuV/m noise limited contour (dashed red) and the predicted population within that contour based on U.S. Census 2000 data.

Exhibit 13 is a principal community contour map demonstrating that the proposed WGTV-DT Channel 8 post-transition DTV facility's F(50,90) 43.0 dBuV/m Principal Community contour would completely encompass the principal community of Athens, GA.

Environmental Impact

The proposed construction would have no significant environmental impact as defined in §1.1307 of the FCC Rules. The digital transmitter, 4-inch (50-ohm) transmission line and antenna system shall produce an ERP of 14.1 kW. It was determined that the maximum lobe of radiation from the base of the tower would occur at approximately 281.6 feet from the base of the tower (301.7-foot radial distance from the antenna center). At approximately 281.6 feet from the base of the tower, the depression angle of the main lobe would be approximately 21° below the horizontal. At that point, the relative field is 0.131 and the power density six feet above the ground would be approximately 0.001 mW/cm². This would only be 0.10% of the Maximum Permissible Exposure (MPE) limits for Occupational/Controlled Exposure and only 0.48% of the MPE limits for General Population/Uncontrolled Exposure authorized by the American National Standards Institute (ANSI).

Kessler and Gehman Associates, Inc.

Telecommunications Consulting Engineers

Since operation of the proposed WGT-TV-DT Channel 8 facility would not exceed 5.0% of the MPE limit for Occupational/Controlled Exposure or General Population/Uncontrolled Exposure at any point on the ground, the proposed WGT-TV-DT Channel 8 post-transition facility would not be considered a “significant contributor” to the RF exposure environment pursuant to OET Bulletin 65, Edition 97-01. Therefore, contributions of exposure from other sources were not accounted for in this analysis. It is safe to conclude that the emissions would be insignificant and well within the maximum allowable requirements. If other antennas are placed on the tower in the future, the applicant will cooperate with those users by reducing or completely terminating the power to the antenna when maintenance workers are in danger from electromagnetic radiation emanating from the antenna.

Certification

This technical statement was prepared by William T. Godfrey, Telecommunications Consultant with Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida and has been working in the field of radio and television broadcast consulting since 1998. He graduated from the University of North Florida with a Bachelor of Arts degree in Criminal Justice and a minor in Mathematics in 1993. As a Professional in the field of Telecommunications he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.

KESSLER AND GEHMAN ASSOCIATES, INC.

A handwritten signature in blue ink that reads "William T. Godfrey, Jr." It is written in a cursive style with a long, sweeping flourish extending from the end of the "y" towards the end of the line.

WGTV-DT CHANNEL 8 POST-TRANSITION DTV FACILITY

ATHENS, GA

ENGINEERING SPECIFICATIONS

A. Transmitter Site:

Geographic coordinates:

North Latitude	33° 48' 18"
West Longitude	84° 08' 40"

Transmitter Site Address: **2 Robert E. Lee Boulevard atop Stone Mountain
Stone Mountain, GA**

B. Main Studio Site Address: **260 14th Street N.W., Atlanta, GA 30318.**

C. Post-Transition Facility:

DTV Channel	Number 8
Frequency	180-186 MHz
Offset	N/A

D. Antenna Height:

Height of Site Above Mean Sea Level (AMSL)	496.4 M
Overall Height of Structure Above Ground	122.5 M
(including all appurtenances)	
Overall Height of Structure Above Mean Sea Level	618.9 M
(including all appurtenances)	
Height of Site Above Average Terrain	219.9 M
Antenna Height Radiation Center (R/C) Above Ground	110.1 M
Antenna Height R/C Above Mean Sea Level	606.5 M
Average of All Non-Odd Radials	276.5 M
Antenna Height R/C Above Average Terrain	330.0 M

E. System Parameters – Horizontal Polarization:

Transmitter Power Output	1.3 kW
Maximum Power Input to Antenna	1.2 kW
Total System Loss	0.59 dB
Transmission Line Efficiency	87.3%
Maximum Antenna Gain in Beam Maximum	10.79 dB
Maximum Antenna Gain in Horizontal Plane	10.49 dB
Maximum Effective Radiated Power	11.49 dBk
In Beam Maximum	14.1 kW
Maximum Effective Radiated Power	11.19 dBk
In Horizontal Plane	13.2 kW

Distance to Contour Values for WGTW-DT Channel 8 Proposed Facility

Call Letters: WGTW-D8 Proposed

Latitude: 33-48-18 N

Longitude: 084-08-40 W

ERP: 14.10 kW

Channel: 8

Frequency: 183.0 MHz

AMSL Height: 606.5 m

Elevation: 496.4 m

Horiz. Antenna Pattern: Omni

Type of contour: FCC

Location Variability: 50.0 %

Time Variability: 90.0 %

of Radials Calculated: 360

Field Strength: 36.00 dBuV/m

Primary Terrain: 3 Second US Terrain
