

Exhibit E-10

The construction permit as issued by the Commission listed two special conditions or restrictions. This exhibit has been included to demonstrate that the applicant would be in compliance with both of these special conditions or restrictions. Each of these conditions or restrictions will be individually addressed in this exhibit.

The first of the special conditions or restrictions requires the permittee/licensee to coordinate with other users of the site to persons of the site from being exposed to radiofrequency levels which may exceed applicable safety standards. The applicant certifies that it will coordinate with all present and future users of the site as necessary to protect workers. Such coordination will include, but is not necessarily limited to, a reduction in transmitter power or cessation of operation.

The second special condition or restriction requires that the applicant have on file FCC Form 350 prior to the commencement of program tests. The applicant certifies that program tests have not yet commenced, but will following the submission of this application with the Commission.
