

Second adjacent interference showing

The proposed site is within the protected contours of WUSW, FCC Facility ID # 38346, and WUIS, FCC Facility ID # 59012. The signals at the site are 75.5 dBu and 82.2 dBu, respectively. Since WUSW has the weaker signal, it is the more critical. The interfering signal is 115.5 dBu.

The proposed antenna is a two-bay Shively 6812b, mounted at 116 m above ground.

The interfering signal is always more than 30 meters above the ground. No tall buildings exist in the area, and the proposal meets the requirements of 74.1204(d).
