

**EXHIBIT 2**

All of the terms, conditions, and obligations set forth in the underlying construction permit for WZZK-FM have been met with the exception of the second special operating condition. The second condition states that measurements shall be made before program tests commence to establish that operation of the facilities authorized in the construction permit complies with the spurious emissions requirements. CXR Holdings, Inc. ("CXR"), permittee of the station, recently learned that due to an inadvertent oversight, these measurements were not made prior to commencing program tests. CXR is acting promptly to mitigate this oversight and will be taking these measurements as soon as possible to ensure that the facilities comply with the spurious emissions requirements. The measurements will be submitted as an amendment to the instant license application in the near term.
