

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CAPSTAR TX LIMITED PARTNERSHIP

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership (“Capstar”). Capstar proposes to modify WYAI(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Call Sign	City of License	Facilities
WGST(AM)	Atlanta, GA	640 kHz, 50 kW, U, DA2
WCOH(AM)	Newnan, GA	1400 kHz, 1 kW, U, ND1
WGSE(AM)	Hogansville, GA	720 kHz, 8 kW, U, DAN
WLDA(FM)	Peachtree City, GA	Channel 244A, 1 kW, 166 m
WYAI(FM)(PROPOSED)	Bowdon, GA	Channel 288A, 61 kW, 367 m
WKLS(FM)	Atlanta, GA	Channel 241C, 100 kW, 300 m
WPCH(FM)	Atlanta, GA	Channel 235C1, 99 kW, 298 m
WMXV(FM)	Canton, GA	Channel 289C2, 16.5 kW, 252 m
WMAX-FM	Hogansville, GA	Channel 251C3, 25 kW, 100 m

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.¹

There are no other principal community coverage contours controlled or proposed to be controlled by Capstar or its affiliates that overlap or intersect the proposed modifications to WYAI(FM)(PROPOSED).

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the commonly owned stations. The predicted principal contours of WGST(AM), WCOH(AM), WGSE(AM), WLDA(FM), WYAI(FM)(PROPOSED), WKLS(FM), WPCH(FM), WMXV(FM), WMAX-FM are shown in Figure 1 herein. There are five “radio markets” for analysis under the Commission’s Rules.

Market 1 is defined by the principal community contours of WGST(AM), WYAI(FM)(PROPOSED), WKLS(FM), WPCH(FM) and WMXV(FM).

Market 2 is defined by the principal community contours of WGST(AM), WLDA(FM), WYAI(FM)(PROPOSED), WKLS(FM) and WPCH(FM).

¹ See Section 73.3555 of the FCC Rules.

Market 3 is defined by the principal community contours of WGST(AM), WCOH(AM) and WYAI(FM)(PROPOSED).

Market 4 is defined by the principal community contours of WCOH(AM), WGSE(AM) and WYAI(FM)(PROPOSED).

Market 5 is defined by the principal community contours of WGSE(AM), WYAI(FM)(PROPOSED) and WMAX-FM.

Count of Stations in Defined Markets

The number of radio stations in each “radio market” is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

In Markets 1, 2 and 3, there are at least 51 radio stations (30 AM and 21 FM), including the subject co-owned stations, that intersect or overlap the “radio market.”

In Markets 4 and 5, there are at least 17 radio stations (7 AM and 10 FM), including the subject co-owned stations, that intersect or overlap the “radio market.”

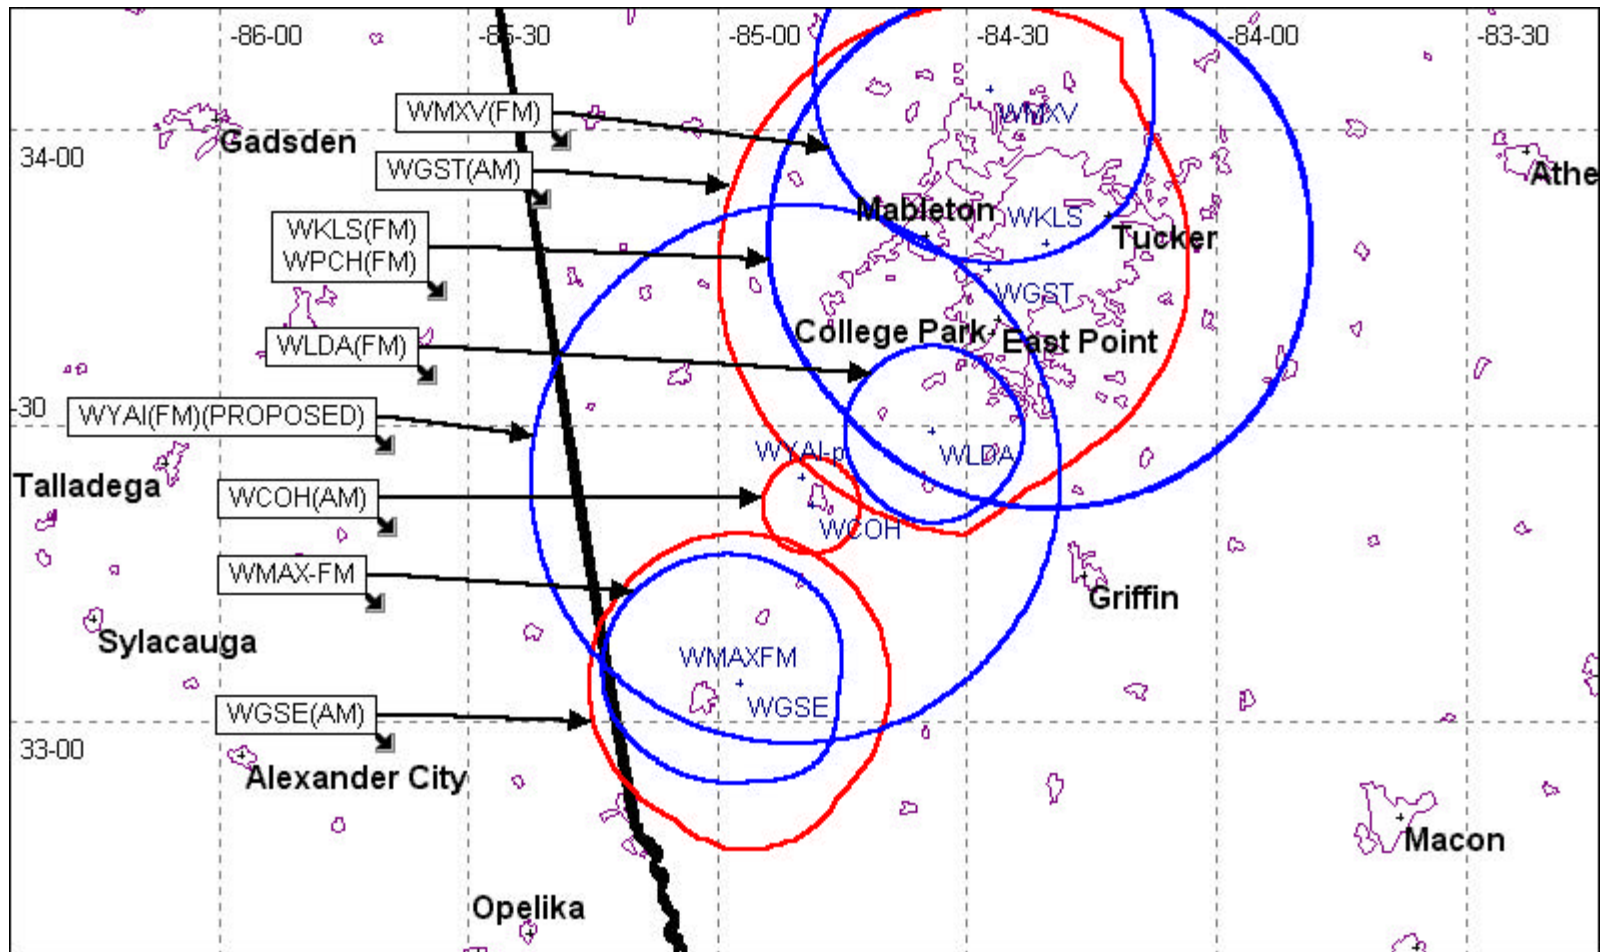

Figure 2 is the tabulation of the other radio stations identified in each of the defined radio market. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced ever 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.
