Re: KLVM FM antenna, Fremont's Peak, Monterey County

Dear Mr. Bushell:

On Saturday, August 19, 2006, a data acquisition team from Monterey County Surveyors, Inc. visited the Fremont Peak transmitter site, the location of the KLVM antenna.

Our requested scope of work was to complete a compass survey to verify the aim point of the KLVM antenna as shown upon the plans labeled "Antenna Orientation" prepared by Electronics Research, Inc., sheet number IA-3 bearing the date of 4/21/06.

We are pleased to report that the results of our compass survey indicate that the radiating element is oriented to an azimuth of 227° from True North.

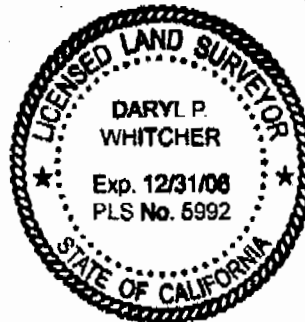

Please call if you have any questions or require any additional information.

Respectfully,

A handwritten signature in black ink, appearing to read 'Daryl P. Whitcher'.

Daryl P. Whitcher
