Subject: BOB FM reception

To: <contact@adelmanbroadcasting.com>, "Jim Kampschroer" <radio2@charter.net>

Cc:

Dir BOB FM technical dept.

I am a regular listener of radio station KCJZ Cambria 105.3 MHz on the FM band. For the last week or so, I can no longer receive BOB FM in Paso Robles, Templeton and Atascadero; areas that use to have usable reception. In fact, as soon as I crest the summit of highway 46 West heading into Paso Robles, your signal gets replaced with some kind of religious station that I believe is Calvary Chapel.

Is there anything that can be done to improve or restore the reception we use to enjoy?

My wife has the same problem in her vehicle and at the office where she works in Paso Robles.

For comparison and when I get tired of 105.3, I also listen to KTEA 103.5 and the reception is fine in these areas.

Thank you for your attention. Your engineer is welcome to contact me if I can provide additional information.

What's happened?

I cannot receive Bob Fm 105.3 while driving around Atascadero and Templeton. All I hear is a religious station !
