

EXHIBIT 13 - 74.1204 OVERLAP SHOWING

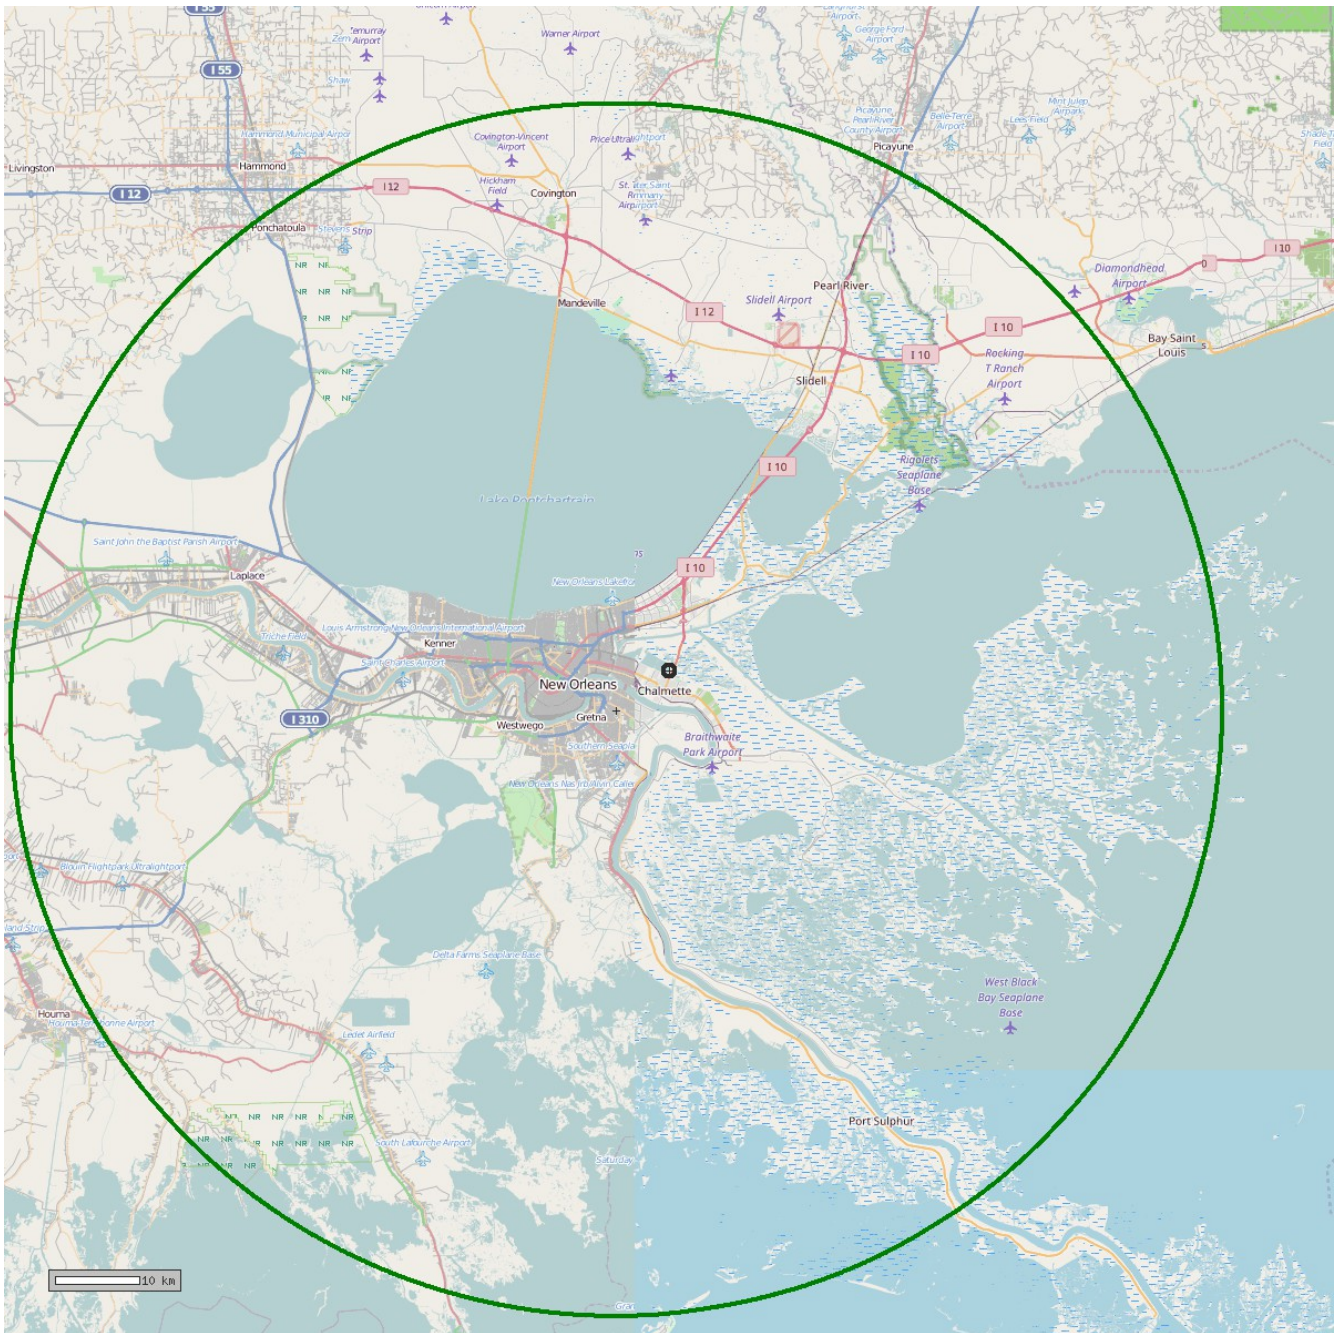

Figure 1: The map above depicts the F(50,50) 60 dBu contour of station WLMG 101.9 FM at New Orleans, Louisiana (Facility ID 34376, green contour) and the F(50,10) 100 dBu interfering contour of the proposed WQNO fill-in translator (dark red contour). Although the proposed F(50,10) 100 dBu interfering contour lies within the WLMG F(50,50) 60 dBu contour, no actual interference is predicted to occur using the antenna system specified herein.

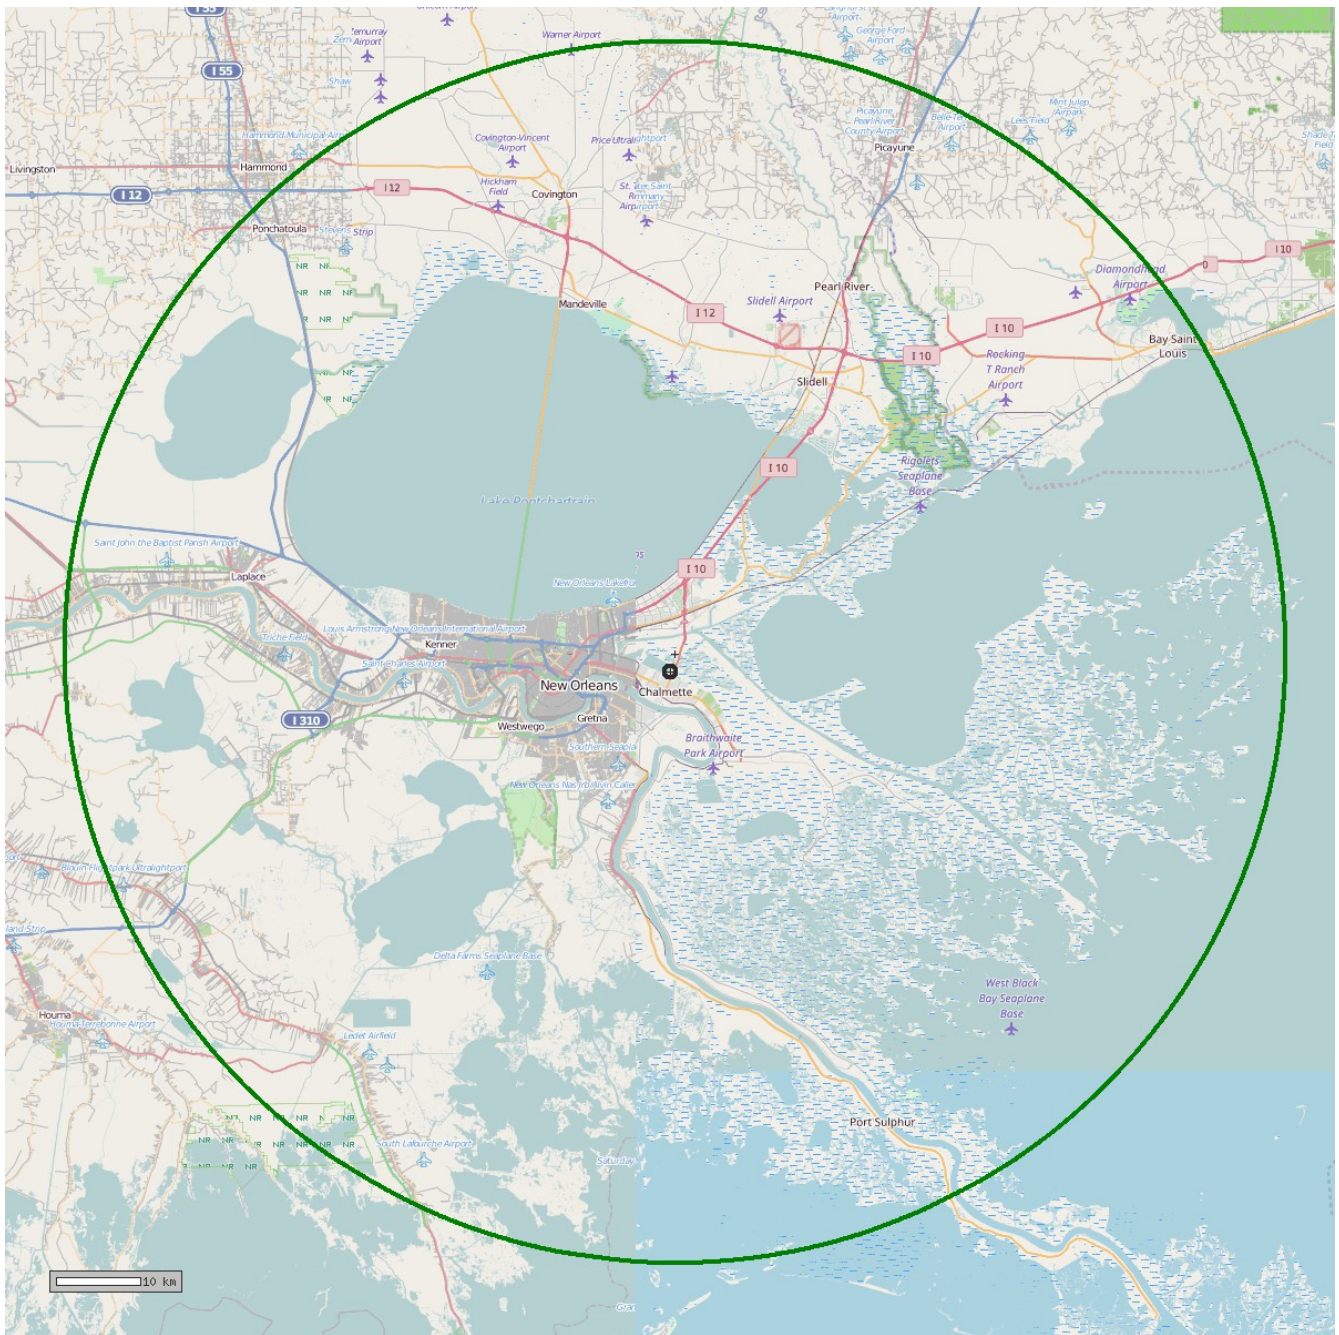

Figure 2: The map above depicts the F(50,50) 60 dBu contour of station WNOE 101.1 FM at New Orleans, Louisiana (Facility ID 58394, green contour) and the F(50,10) 100 dBu interfering contour of the proposed WQNO fill-in translator (dark red contour). Although the proposed F(50,10) 100 dBu interfering contour lies within the WSEA F(50,50) 60 dBu contour, no actual interference is predicted to occur using the the antenna system specified herein.

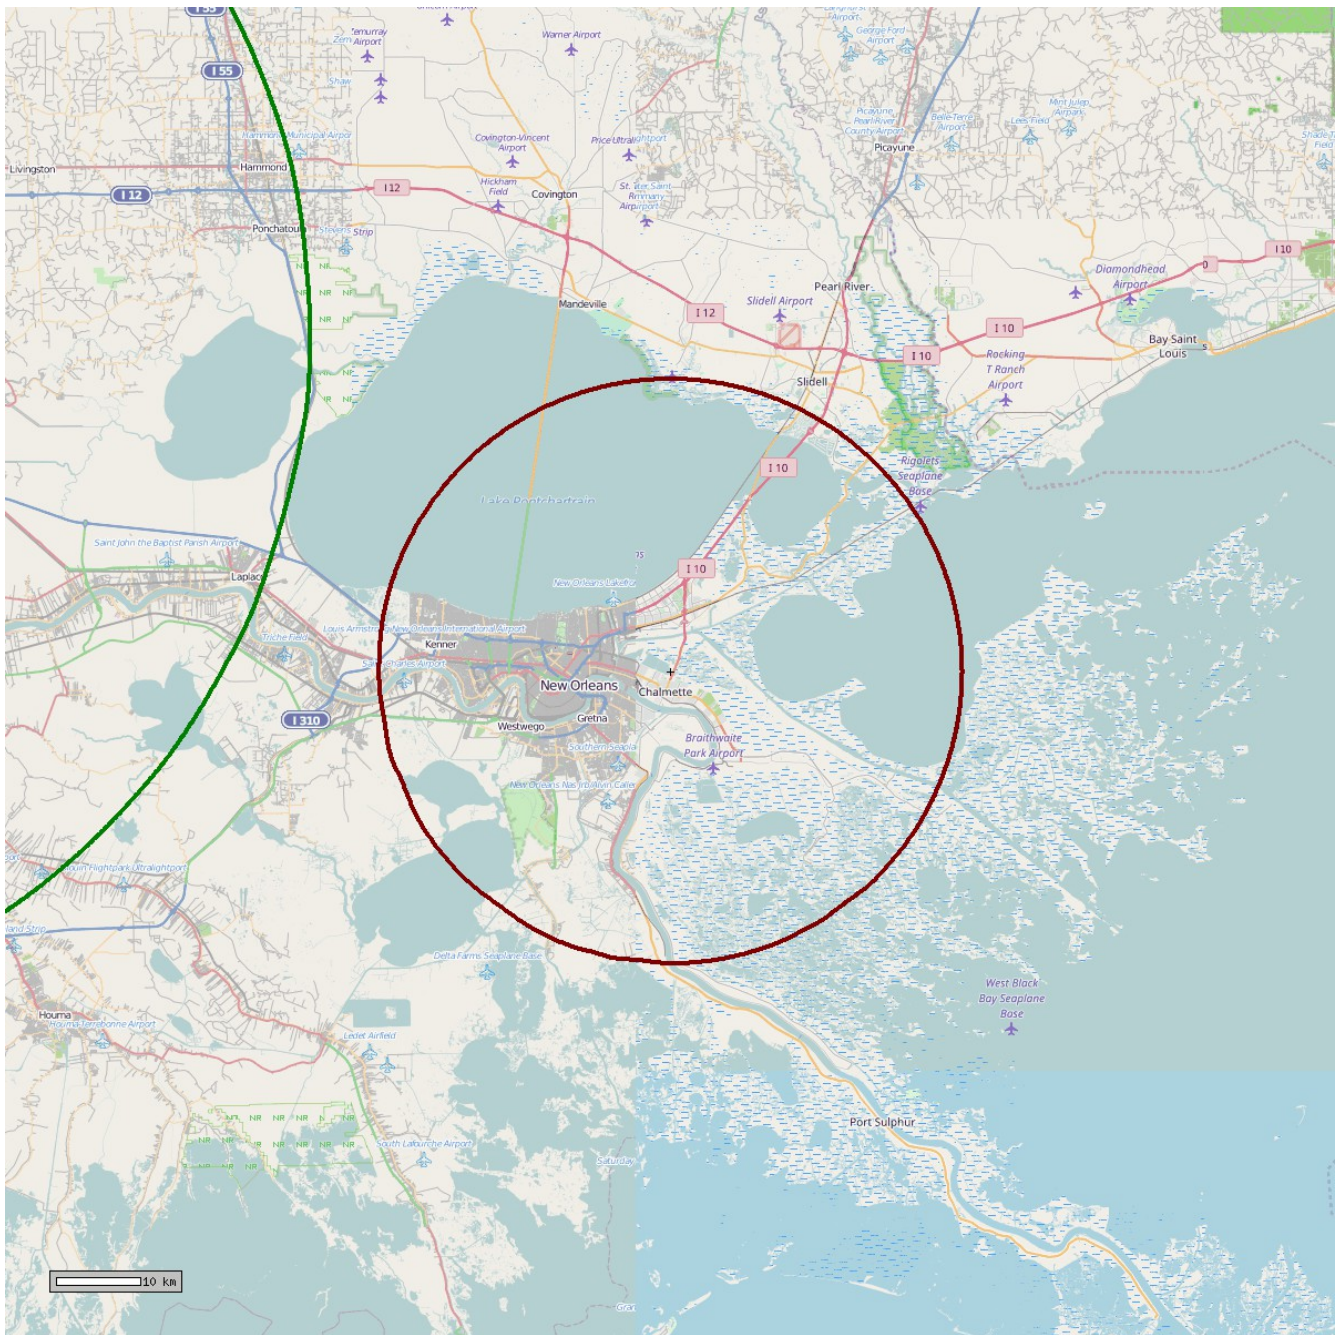

Figure 3: The map above depicts the F(50,50) 60 dBu contour of station WYNK 101.5 FM at Baton Rouge, Louisiana (Facility ID 47402, green contour) and the F(50,10) 40 dBu interfering contour of the proposed WQNO fill-in translator (dark red contour). As shown above, there is no point at which the fill-in translator's interfering contour overlaps the F(50,50) 60 dBu contour of WYNK.
