

EXHIBIT NO. 7 - ENVIRONMENTAL STATEMENT

This proposal does not involve a site location specified under Section 1.1307(a) through (a)(8) of the FCC Rules.

Less than 10 percent of the radiation standard is predicted at ground level due to the proposed operation. The electromagnetic radiation from this proposed operation will not produce a value in excess of the radiation standard. The electromagnetic radiation from the proposed operation will not combine with the other facilities on the structure to produce a significant change in value. Any excess of the radiation standard that presently exists at the site will not be noticeably changed due to the proposed changes.

Since this is an existing structure which supports various existing operations, the applicant will cooperate with the existing operators in establishing a plan for work done on the building in close proximity to the existing antenna.
