

EXHIBIT 6

Minor Modification To A Construction Permit

K34HL

Permit File Number: BNPTTL-20000807AFF

Facility ID. No: 125320

This Technical Exhibit is attached to FCC Form 346 in support of the Applicant's request for a minor modification to K34HL (BNPTTL-20000807AFF, Facility ID. 125320). The proposed operational parameters for K34HL are as follows:

Channel:	34
Frequency Offset:	Minus Offset
Antenna radiation center height above ground level:	30 m
Maximum effective radiated power:	10 kw
Antenna type and model #:	4DR-8S
Antenna Orientation	170
Transmitter Site	46-46-11 N 112-01-25 W

A study has been conducted using the provisions of sections 74.703 74.705, 74.706, 74.707, and 74.709 which indicates that the proposal will not create prohibited interference with other existing NTSC full power, DTV, LPTV, or Land Mobile facilities other than the NTSC Full-Power station, LPTV facilities, and DTV facilities listed below. However, based upon the provisions of OET 69, the proposed station's operation complies with the FCC's interference criteria towards the aforementioned stations. Below is a complete analysis and tabulation of the predicted interference that would be caused by this proposal pursuant to the provisions of OET 69. This analysis indicates that no prohibited interference will be caused by the operation of the proposed facility. **Accordingly, applicant requests a waiver of Sections 74.705, 74.706, and 74.707 based upon the results of the OET 69 analysis with regard to the aforementioned NTSC Full Power, DTV, and LPTV facilities.**

Full Service NTSC Facilities

An interference analysis was conducted using 74.705 criteria and OET 69 Bulletin standards with regard to the effect of the proposed station on the NTSC full power station listed below. Below is a tabulation of the results from the Bulletin OET 69 study.

NTSC Full-Power	FCC Service Population	Proposed Interference Population
KLMN, CH 26 GREAT FALLS, MT FILE NO. BLCT-20030611ABD LICENSE	74,989	0 (0.0%)

As shown by the table above, the facility proposed by this application will cause no interference to the existing NTSC facility.

DTV Facility

An interference analysis was conducted using OET 69 Bulletin standards, as permitted by 74.703 and 74.706, with regard to the effect of the proposed station on the following DTV facility:

Protected DTV Station	FCC Service Population	Proposed Interference Population
KTVM-TV, CH 33 BUTTE, MT FILE NO. BPRM-20001106ACL DIGITAL RULEMAKING	124,429	249 (0.2%)

As indicated in the above table, there will be virtually zero interference caused by the operation of the proposed station to the DTV facility and the deminimis predicted interference is far below the .5% rounding allowance permitted for such calculations.

LPTV Facilities

An interference analysis was conducted using OET 69 Bulletin standards, as permitted by 74.707, with regard to the effect of the proposed station on the following LPTV facilities:

Protected LPTV Station	FCC Service Population	Proposed Interference Population
K34FI, CH 34 BOZEMAN, MT FILE NO. BLTTL-20020521AAK LICENSE	5,828	0 (0.0%)
K34FI, CH 34 BOZEMAN, MT FILE NO. BPTT-20040303ABK CONSTRUCTION PERMIT	33,421	0 (0.0%)
NEW, CH 33 HELENA, MT FILE NO. BNPTTL-20000829AJX APPLICATION	44,583	0 (0.0%)
NEW, CH 33 HELENA, MT FILE NO. BNPTTL-20000824ADU APPLICATION	146	0 (0.0%)
NEW, CH 34 BUTTE, MT FILE NO. BNPTTL-20000830BMZ APPLICATION	34,327	0 (0.0%)
NEW, CH 34 BUTTE, MT FILE NO. BNPTTL-20000807ADB APPLICATION	28,738	0 (0.0%)

As the above table indicates, the proposed facility will not cause objectionable interference to any LPTV facilities.

Land Mobile

There are no cochannel or first adjacent land mobile facilities within 145 kilometers of this proposal. Accordingly, this proposal meets all Land Mobile protections as contained in Section 74.709.
