

June 16, 2014

Exhibit 14

The transmitting antenna for the proposed facility is to be located on an existing structure. No structural modifications are proposed and this proposal presents no environmental issues that need to be addressed in order to demonstrate compliance with the provisions of Section 1.1306 of the Commission's Rules.

Compliance with RF Exposure Guidelines

There are no other radiation sources located on this tower that need to be considered in the RF Exposure evaluation.

1. This application proposes a transmitting antenna located 33 meters above ground level and will operate with a circularly polarized antenna with a power of 75 watts. Analysis of this proposal using the OET Bulletin 65 guidelines, assuming 100% reflection, shows that this proposed operation produces a worst case power density of 5.2 microwatts/sq. cm. 2 meters above ground level at the base of the tower. This is well below the allowed limit of 200 microwatts/sq. cm. for an uncontrolled environment as outlined in OET Bulletin 65 and there is no potential for inadvertent exposure of the general public to potentially harmful RF radiation.

The applicant will cooperate with other users of this site to ensure that maintenance personnel are not subjected to potentially harmful radiation. While maintenance personnel are working on the supporting structure the applicant will reduce power or terminate transmitter operation as may be necessary to

minimize the risk of exposure to potentially harmful RF radiation to maintenance personnel.

CERTIFICATION

This engineering statement has been prepared by the undersigned and is true and correct to the best of his knowledge and belief, and is submitted in good faith. My qualifications are a matter of record before the Commission.

The undersigned is aware that this document is being filed with the Federal Communications Commission in connection with FCC Form 301-FM filed by Alamo Methodist Church, and hereby consents to its use for that purpose.

Dated this 17th day of June 2014.

Respectfully,

A handwritten signature in black ink, appearing to read "F. W. Hannel", written over a horizontal line.
