February 11, 2019

WSUA BROADCASTING CORPORATION

2100 Coral Way - Suite 704
Miami, FL, 33145
Attn: Eucario Bermudez, President

Mr Bermudez:

With this letter, 1Miami Inc., licensee of Low Power FM Station WMXR-LP Miami Florida, hereby states our objection to the construction and operation of your FM translator W224EH, as authorized by BNPFT-20181029AAX. Low Power FM Station WMXR-LP is licensed by BLL-20180614ABF to operate co-channel with this translator authorization, and the operation of W224EH will cause significant interference and harm to the established listening audience of WMXR-LP.

WMXR-LP is located 20km away from the site specified in BNPFT-20181029AAX, and WMXR-LP has pending application BPL-20181203ABT to operate at a site just 10km away from W224EH. Studies attached herein by 1Miami Inc. will demonstrate that any operation of W224EH will cause predicted interference inside the licensed WMXR-LP interference free contour as well as the established listening audience outside that primary signal area.

Should WSUA Broadcasting Corporation attempt to commence operation of W224EH, 1Miami Inc. will use all avenues of authority available to request the FCC to issue order to cease broadcasting. 1Miami Inc. strongly encourages WSUA Broadcasting to seek an alternate operating frequency for W224EH at its soonest possible convenience.

Respectfully,

Signed: _____

A handwritten signature in black ink, appearing to read "Eric Brakken", is written over a horizontal line.
