Request for Extension of Reduced Power STA for DTV Station

NCE Station KRMA-DT, Denver, CO (F.I.N. 14040)

Rocky Mountain Public Broadcasting Network, Inc. ("RMPB"), pursuant to Section 73.1635 of the Commission's rules, respectfully requests an extension of Special Temporary Authority ("STA") to permit continued operation of reduced power DTV facilities for noncommercial educational television Station KRMA-TV/DT, Denver, Colorado.

The Commission originally granted this STA for the reduced power operation of Station KRMA-DT on March 19, 2003 (*see* FCC File No. BDSTA-20030224ADA, enclosed). The STA was most recently extended by an FCC grant on December 2, 2005 in File No. BEDSTA-20051004ABC and is currently due to expire on June 2, 2006. Pursuant to Paragraphs 34-36 of the *Memorandum Opinion and Order on Reconsideration* in MM Docket No. 00-39, FCC 01-330 (rel. Nov. 15, 2001), RMPB requests an extension of this STA for a period of six months, or at least through **July 1, 2006**.

RMPB proposes no technical changes to its STA operation as outlined in the initial request and granted by the Commission. The STA specifies an ERP of 13.8 kW, a height of radiation center of ground level of 227 meters and geographical coordinates of 39-44-37 N; 104-59-18 W. Grant of this extension would serve the public interest because it would allow RMPB to maintain, without interruption, its existing digital noncommercial television programming for its viewers in the Denver area.
