

RF Exposure Statement
WDIV-TV Detroit, MI
Auxiliary Antenna

The facility proposed in this application is for a post DTV transition auxiliary antenna that will be mounted on the same tower as the currently authorized facility at a height of 256 meters above ground level.

An evaluation of the proposed facility has been made and it has been determined that the requirements of 47 CFR section 1.1307 have been met including the exposure to radio frequency radiation by either the general public or workers at the station.

The location of the transmitting equipment will be situated so that the general public will not have access to areas where radio frequency radiation would be at or in excess of the level that is considered harmful. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
