MOUNT DORA, FLORIDA
October 2011

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Central Florida Educational Foundation, Inc. ("CFEF"), licensee of FM translator station W241BL, Channel 240D, Tavaras, Florida. CFEF has a construction permit for W241BL to relocate the facility to another site (BPFT-20110812ABW). Exhibit A is a calculation of the transmitter power output for FM translator W241BL

There are two special operating conditions/restrictions listed on the W241BL permit. The first condition states that the W241BL translator will rebroadcast the HD Channel 2 of station WXXL, Tavares, Florida. CFEF acknowledges this condition. The second condition states that CFEF will reduce the power of W241BL or cease operation to insure persons with access to the site are not exposed to radio frequency radiation levels above the limits. CFEF states that it will, in cooperation with other tower users, reduce the power of W241BL or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines.

Based on the foregoing, it is believed that all conditions have been satisfied and W241BL has been constructed in compliance with the Commission's rules.
