

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CC LICENSES, LLC

This statement and the attached figures were prepared on behalf of CC Licenses, LLC ("CCLL"), a licensee subsidiary of Clear Channel Communications, Inc. ("CCC"). CCLL proposes to modify the facilities of KCAD AND KZR(X) Dickinson, ND. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership, time brokerage or joint sales.¹

Table 1: Proposed Commonly Owned, Brokered or Jointly-Sold Stations Studied and Associated Arbitron Metro² Information

Call Sign	Band	Facility id	City	State	Geographic Arbitron Market	Declared Arbitron Market
KXMR	AM	2211	BISMARCK	ND	Bismarck, ND	Bismarck, ND
KLTC	AM	71870	DICKINSON	ND	Non-Metro	Non-Metro
KCAD	FM	57740	DICKINSON	ND	Non-Metro	Non-Metro
KZR(X)	FM	57741	DICKINSON	ND	Non-Metro	Non-Metro

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations) an ownership study has been prepared in accordance with the Federal Communications Commission's local radio ownership rule.³

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of KCAD AND KZR(X) as proposed.

Interim Contour-Overlap Analysis

Because the principal community of the station to be modified are **NOT** located inside or are declared home to an Arbitron Metro, an interim contour-overlap analysis is not required.

Interim Contour-Based Radio Markets

A "radio market" under the interim contour-overlap method is the area encompassed by the mutually overlapping principal community contours of the stations under common-ownership or attribution.

Just one "radio market" is defined by the mutually overlapping principal community contours of the stations listed in Table 1 above, below as Figure 1 is a map of the station shown in Table 1.

¹ None of the following stations are attributable by virtue of a time brokerage agreement or joint sales agreement.

² Arbitron data presented herein is obtained from BIA's "Media Access Pro."

³ See 47 C.F.R. § 73.3555(a).

Count of Stations in Defined Markets

The number of radio stations in an interim contour-overlap "radio market" is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or attributable stations, excluding any stations whose transmitter sites are further than 92 kilometers from the perimeter of mutual overlap, and excluding any commonly owned or attributable stations that do not serve to define the market.

In the interim contour-overlap "radio market(s)" studied herein, there are at least ten radio stations, including the subject commonly owned stations, which overlap or intersect with the defined "radio market(s)". With ten stations in a market, the applicable ownership limit is a combination of no more five stations, not more than half of all stations in the market, up to three in one service.

Figure 3 is the tabulation of the radio stations identified in the "radio market(s)." Figure 2 is a map depicting the stations so identified. Only known licensed, operating radio stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 5 degrees of azimuth.

Conclusions

In the Arbitron Radio Market studied herein, there are at least 10 radio stations, including the subject commonly-owned 2-AM / 2-FM stations. This proposal does not affect the existing number of commonly-owned stations in the subject Radio Market.

Based on the above, it is concluded that the proposed modification complies with Section 73.3555(a) of the FCC Rules.
