

EXHIBIT 1

Changes Contained in This Amendment:

None. This application is being filed from the same facility as specified in the original 20030317AXU application.

Preclusion to LPFM Points:

The proposed facility has been studied to ensure that no preclusion will occur to LPFM "sacred" points. Due to the location of the proposed transmitter site being within 39km of a Spectrum Limited Market Grid, preclusion study is provided per the instructions given in DA 13-427, Attachment B, Example B. The preclusion consists of a Grid Test for the Spectrum Limited Indianapolis market (SL30 - Mkt #040). Because the proposed facility is (just) inside the SL market grid, a Site Test is not required.

The proposed facility meets all minimum distance separation requirements with regard to co-channel or first adjacent stations, as can be seen in the Grid Test on the following pages.

Therefore, the proposed facility does not preclude any LPFM opportunities within the area of minimum required separation.
