

**Exhibit 7**

The purpose of this exhibit is to explain the difference between the antenna model number granted and the antenna model constructed in this application. Specifically, the ERI model ESR-8U4-HP2CX-33 requested and granted was substituted with an ERI model ESR-8U4-HSP2CX-33. The "S" added to the model number designates that the antenna is designed to be side-mounted. The difference in the antenna model number does pertain to any changes in the horizontal radiation pattern, effective radiated power or height of the center of radiation.

Submitted by,

A handwritten signature in black ink, appearing to read "WB Miller". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
