You don't often get email from kevinyoungers@comcast.net. [Learn why this is important](#)

Victoria,

W286DU resumed operation on 12/11/2020. (Same date as the filing of the license to cover application.)

Thank you,
Kevin Youngers

No, that is not how it works. Once you notify us that the station is silent, you are required to notify us when it resumes operation. Please refer to the letter granting STA. We do not assume it is operating when we grant a license application. If you can verify the date that it resumed operation, we will update our records.

Victoria,

Hello, the translator W286DU is on the air. I am sorry for any confusion, but will look into the cause.

After 8/20/2020, on 9/14/2020, a minor modification, file 0000121088, was filed to change the channel from 283 to 286. The new CP was granted on 9/23/2020.

On 12/11/2020, a license to cover application, file 0000129612, was filed. The new license was granted on 1/15/2021.

It seems the new license grant should have changed the status to on the air. W286DU has been on the air under the latest license since 12/11/2020.

Please give me a call when you have a chance.

Thank you,

Kevin Youngers

Hi Geniece,

I am forwarding this along to you. To my recollection, I have not been involved in the construction of this translator, so I'm not quite sure what the issue is.

If you'd like to discuss before you contact her, please let me know. I am on vacation for the rest of the week but could make time tomorrow or Friday for a call. The main thing is to let her know that you are investigating and will respond soon.

Thanks,

Scott

Please clarify the operating status of Station W286DU. Our records show that it went silent on 8/24/2020, and no resumption of operations was filed, so the status remains "licensed and silent." We also see that a license to cover was granted on 1/15/2021. Please respond to this email within 3 days, or we will send an OSI to the licensee to verify the status of the station's license under Section 312(g) of the Act.
