

**Exhibit 2**  
**Explanation of Circumstances Warranting Grant of STA**

Sea-Comm, Inc. (“Sea-Comm”) holds a license from the Commission that authorizes Sea-Comm to operate commercial FM radio broadcasting station WWTB in Topsail Beach, North Carolina. Station WWTB bears the Commission’s Facility Identification Number 67339.

Sea-Comm also holds a license for, *inter alia*, FM radio broadcasting station WNTB, Topsail Beach, North Carolina (Facility Identification Number 73954), which was granted on March 16, 2007 in order to cover a then-outstanding modified construction permit to modify WNTB’s facilities, including a change in its community of license to Topsail Beach from Wrightsville Beach, North Carolina (File No. BMPH-20060921AAY). As re-issued on January 30, 2007, the modified construction permit required WWTB to suspend operations as a condition to the commencement of program test operations by WNTB pursuant to the modified construction permit. (*See* Condition 4 of the re-issued modified construction permit). WNTB commenced program testing on February 1, 2007, and thus, in accordance with the referenced condition, WWTB suspended operations on that date. The re-issued condition requires that WWTB cannot resume operations until the earlier of (i) completion of the modifications of its transmitting facilities authorized in Construction Permit File No. BPH-20060224AAF (as such Construction Permit may be modified), including the change in its community of license to Swansboro, North Carolina or (ii) the consummation of the assignment of the WWTB license and other authorizations to Educational Media Foundation as set forth in File No. BALH-20070108ABA.

A contractual condition to Educational Media Foundation’s obligation to close on its purchase of the FCC license and other authorizations for WWTB is that the Station’s transmitting facilities specified in the pending application (File No. BMPH-20070409ACP, as amended) shall have been authorized by the Commission and shall have been fully constructed, such that the Station shall then be in a position immediately thereafter to commence operating with such facilities pursuant to automatic program test authority. At the present time, however, Sea-Comm is awaiting Commission action on the pending construction permit modification application in File No. BMPH-20070409ACP, as amended. In the meantime, however, the special temporary authorization (“STA”) in File No. BLSTA-20070208AAE for WWTB to remain “silent,” granted in February 9, 2007, is scheduled to expire on August 8, 2007.

Sea-Comm thus respectfully requests an extension of its existing STA in File No. BLSTA-20070208AAE in order to allow WWTB to remain silent for an additional approximately six months, through and including January 31, 2008.
