CHESTERFIELD, SOUTH CAROLINA
February 2008

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Our Three Sons Broadcasting, LLP ("OTSB"), licensee of radio station WVSZ, Channel 297A, Chesterfield, South Carolina. OTSB has installed a new Electronics Research, Inc., Model LPX-5E, five bay non-directional antenna to replace the licensed non-directional antenna. This change can be made without prior permission from the Commission, pursuant to §73.1690(c)(1) of the rules. The antenna was installed with the same center of radiation as the previous antenna. A calculation of the transmitter power output of the WVSZ transmitter is attached as Exhibit A.

Since there is no construction permit, there are no conditions to be met. However, OTSB herein states that it will reduce the power of WVSZ or cease operation, as needed, to insure that persons with access to the tower will not be exposed to radio frequency radiation levels in excess of the Commission's guidelines. Based on the foregoing, it is believed that WVSZ is operating in compliance with the Commission's rules.
