

SPECIAL OPERATING CONDITION COMPLIANCE STATEMENT:

By paragraph number listed on the Construction Permit, BMPFT-20160728AFW, for K210EC, facility ID 155203. The following is will show the compliance with the Special Operating Conditions:

- 1) The licensee will cooperate and coordinate with other users of the site to either reduce power or cease broadcasting if maintenance or service is needed on the KGNU(AM) tower site.
- 2) Form 350 is being filed prior to normal broadcasting is commenced with K210EC.
- 3) Special Operating Condition #3 basically calls for measurement of the AM station base resistance, or in this case, AM station KGNU(AM) Denver, Colorado, facility ID 31349, to confirm that with the addition of the FM antenna and transmission line, that KGNU's base impedance did not change by more than 2 percent. The FM antenna was mounted on the north leg of the tower and transmission line was fed down the center of the tower to help not effect the AM's impedance. An isocoupler was mounted at the base of the tower. Measurements were made using an Delta Electronics OIB-3 Impedance bridge. No material change in base impedance was measured after the addition of the FM antenna and transmission line for K210EC. Base resistance for KGNU(AM) remains 91 ohms. Thus, a new license application Form 302-AM for KGNU(AM) is not required.
- 4) K210EC has entered into a rebroadcasting agreement with KGNU(AM) Denver, Colorado, facility ID 31349, 1390 Khz. This agreement has a term of a minimum of 4 years. K210EC will rebroadcast KGNU(AM) for a minimum of 4 years as required.
