

MINOR CHANGE APPLICATION
CUMULUS LICENSING LLC
WWKL (FM) RADIO STATION
CH 221A - 92.1 MHZ - 1.5 KW
PALMYRA, PENNSYLVANIA
October 2005

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of WWKL, Channel 221A, Palmyra, Pennsylvania. Cumulus herein proposes to make minor changes in the facilities of WWKL by relocating to a new site, increasing the height above average terrain and lowering the effective radiated power.

Cumulus is proposing to locate the antenna system for WWKL on a new tower. The proposed tower is less than 200 feet above ground. As such, the Federal Aviation Administration was not apprised of this proposal. A review of the proposed tower indicates that the tower does not require FCC registration.¹ At the site proposed in this application, Channel 221A does not meet the Commission's minimum distance separation requirements to four other FM facilities. As such, processing pursuant to §73.215 is requested. Exhibit A is a demonstration that this proposal complies with §73.215 of the rules. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Cumulus and is available to the Commission upon request.

1) Based on the Commission's Tow-Air program.
