**AMENDMENT TO APPLICATION FOR
MODIFICATION OF CONSTRUCTION PERMIT**

The following engineering statement and attached exhibits have been prepared for **Chicago Independent Radio Project** ("CHIRP"), permittee of low-power FM station WCXP-LP at Chicago, Illinois, and are in support of their amendment to application for modification of construction permit.¹ This submission seeks to provide additional information requested by the Staff, and is an amendment to the pending application under FCC File No. BMPL-20170515AAJ.

By way of telephone, the Staff advised the applicant that it would be necessary to provide a vertical plan sketch of the proposed installation. This sketch is intended to demonstrate that the proposed facility would comply with the Antenna Structure Registration procedures, and to confirm that registration of the structure is not required. This amendment provides this information via a sketch, as well as the results from a run of the Commission's *TOWAIR* utility for the proposed facility. As is demonstrated, the proposed installation complies with the "20 foot rule" and does not require registration.

This amendment to the pending application does not propose any change to the technical parameters associated with the facility. The proposed facility, as described in the modification application, does not constitute a significant environmental impact, and is exempt from environmental processing.

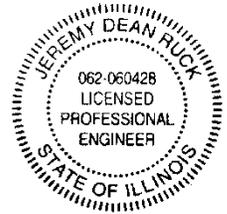

¹ The Facility ID for WCXP-LP at Chicago, Illinois is 192383.

*** NOTICE ***

TOWAIR's findings are not definitive or binding, and we cannot guarantee that the data in TOWAIR are fully current and accurate. In some instances, TOWAIR may yield results that differ from application of the criteria set out in 47 C.F.R. Section 17.7 and 14 C.F.R. Section 77.13. A positive finding by TOWAIR recommending notification should be given considerable weight. On the other hand, a finding by TOWAIR recommending either for or against notification is not conclusive. It is the responsibility of each ASR participant to exercise due diligence to determine if it must coordinate its structure with the FAA. TOWAIR is only one tool designed to assist ASR participants in exercising this due diligence, and further investigation may be necessary to determine if FAA coordination is appropriate.

DETERMINATION Results

Structure does not require registration. The structure meets the 6.10-meter (20-foot) Rule criteria.

Your Specifications

NAD83 Coordinates

Latitude	41-58-44.0 north
Longitude	087-39-19.0 west

Measurements (Meters)

Overall Structure Height (AGL)	71.6
Support Structure Height (AGL)	68.3
Site Elevation (AMSL)	178.9

Structure Type

BPOLE - Building with Pole
