Environmental Statement
Exhibit 35

The transmitting antenna for the proposed facility is to be located on a yet to be constructed tower and the applicant will immediately file FAA Form 7460 requesting FAA authorization to construct the proposed tower. Following FAA approval of the proposed construction, the applicant will complete the environmental analysis that addresses the issues outlined in Section 1.1306 of the Commission's Rules and register the tower with the FCC.

Compliance with RF Exposure Guidelines

The proposed antenna in this application is the only radiation source to be considered as there are no other radiation sources proposed to be mounted on this tower.

1. This application proposes a transmitting antenna located 84 meters above ground level and will operate with a circularly polarized antenna with a power of 6 kw. Analysis of this proposal using the OET Bulletin 65 guidelines shows that this proposed operation produces a worst case power density of 62.6 microwatts/cm² at a point 2 meters above ground level at the base of the tower. This is well below the allowed limit of 200 microwatts/cm² for an uncontrolled environment as outlined in OET Bulletin 65 and there is potential that the general public would be inadvertently exposed to potentially harmful RF radiation.

The applicant will cooperate with other users of this site, if any, to ensure that maintenance personnel are not subjected to potentially harmful radiation.

While maintenance personnel are working on the tower the applicant will reduce power or terminate transmitter operation as may be necessary to minimize the risk of exposure to potentially harmful RF radiation to maintenance personnel working on the tower/antenna.

CERTIFICATION

This engineering statement has been prepared by the undersigned and is true and correct to the best of his knowledge and belief, and is submitted in good faith. My qualifications are a matter of record before the Commission.

The undersigned is aware that this document is being filed with the Federal Communications Commission in connection with FCC Form 301-FM filed by Radio Dalhart, Inc., and hereby consents to its use for that purpose.

Dated this 23rd day of July 2013.

Respectfully,

A handwritten signature in black ink that reads "F. W. Hannel". The signature is written in a cursive style and is positioned above a horizontal line.
