

EXHIBIT A

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of KSKN TELEVISION, INC., permittee of KSKN-DT, Channel 36 in Spokane, Washington, in support of this amendment to its pending application for modification of Construction Permit BMPCDT-20031110AMP, to specify an increase in effective radiated power. No change in effective antenna height, antenna model or site location is proposed herein.

Exhibit B provides the previously proposed directional antenna pattern data. Exhibit C is a map upon which the predicted service contours are plotted. As shown, the city of license is completely contained within the proposed 48 dBu service contour. Since the proposed effective radiated power is greater than that specified in the KSKN-DT allotment, an interference study is included in Exhibit D. A power density calculation is provided in Exhibit E. It is not expected that the proposed facility would cause objectionable interference to any other user of the site proposed herein, but the owner of KSKN-DT recognizes its obligation to correct any such interference that may occur.

The facility described herein proposes operation with an effective radiated power of 1000 kw at an effective antenna height of 622 meters, in apparent violation of Section 73.622(f)(8) of the Commission's Rules. However, according to Section 73.622(f)(5), a station may propose an increase in facilities in excess of those in paragraph (f)(8) as long as its coverage area does not exceed that of the largest DTV facility in the market. The following tabulation reveals that the coverage area of the instant proposal is less than that of four other DTV facilities in the Spokane market:

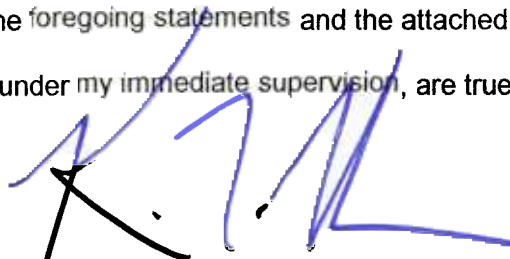

EXHIBIT A

<u>Call Sign</u>	<u>CH.</u>	<u>City, State</u>	<u>Status</u>	<u>File Number</u>	<u>Contour Area (km²)</u>
KAYU-DT	30	Spokane, WA	CP	BPCDT-19991027AAB	40,550
KHQ-DT	15	Spokane, WA	CP	BPCDT-19991027ACF	44,943
KREM-DT	20	Spokane, WA	CP	BPCDT-19991028ABY	48,386
KXLY-DT	13	Spokane, WA	Lic.	BLCDT-19991104ABD	52,987
KSKN-DT	36	Spokane, WA	Appl.		32,885

Therefore, a waiver of Section 73.622(f)(8) of the FCC's Rules is respectfully requested and believed to be justified.

Since no change in the overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued Antenna Structure Registration Number 1033992 to this tower.

declare under penalty of perjury that the foregoing statements and the attached Engineering Report, which was prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.
