

EXHIBIT 12

May 1, 2006

Calvary Chapel of Twin Falls, Inc.

K200AA Sun Valley, NV

This is a minor modification to the underlying construction permit of K220AA, Sun Valley, File No: BPFT-20050324AFP. This modification is being made on Channel 200, frequency 87.9MHz. Due to the incapability of the CDBS electronic filing system to accept an application on Channel 200, Channel 201 was placed in Tech Box 1. We have been advised by the FCC to file the application in this manner, and that the FCC staff will manually override CDBS and change the application to Channel 200 once the application is in the system.

Calvary Chapel of Twin Falls, Inc. does not propose to change channel from 200, or call sign from K200AA, but rather only tower location.
