To whom it may concern:

American Family Radio installed a Shively 6513-2-DA on a Rohn 25G guyed tower at a COR of 42 meters at 3309 Hough Road, Florence, AL. The antenna was directed at an azimuth of 208 degrees and installed per directions accompanying the antenna from Shively. The azimuth of the antenna was verified by White, Lynn, Collins, and Associates, a civil engineer/land surveyor company, before AFR left the job site.

AFR has completed antenna installations and maintenance in twenty states, including directional and non-directional antennas. American Family Radio has been involved in antenna work since 1991 with manufacturers such as Shively, Scala, Jampro, and ERI antennas.

The crew leader on this job was myself, Joey Moody, chief engineer of American Family Radio. I have been in the broadcast industry since 1994.

Sincerely,

  
Joey Moody
