In re: NEW(FM), Bullhead City, AZ  
BNPFT-20171201ABE  
Facility ID No. 201616

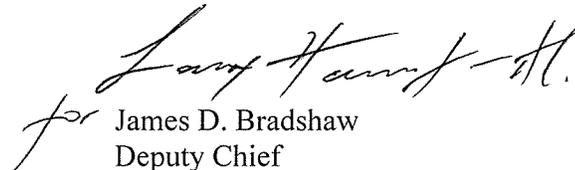

Dear Applicant,

This letter refers to the above-captioned application for a new translator.

Our study of the application reveals that it is in violation of 47 CFR Section 74.1201(g) of the Commission's Rules. Section 74.1201(g) states that the coverage contour of an FM translator rebroadcasting an AM radio broadcast station as its primary station must be contained within the greater of either the 2 mV/m daytime contour of the AM station or a 25-mile (40 km) radius centered at the AM transmitter site. The proposed coverage contour (60 dB $\mu$ ) of the translator extends beyond the 2 mV/m daytime contour of the AM station and the 25-mile (40 km) radius centered at the AM transmitter site. This was not addressed in the application.

In light of the above, the application BNPFT-20171201ABE filed by Cameron Broadcasting, Inc., is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

  
for James D. Bradshaw  
Deputy Chief  
Audio Division  
Media Bureau
