Ladies and Gentlemen:

This will confirm that Meredith Corporation, licensee of WFSB (TV), Hartford, Connecticut, does not object to the application of CBS Broadcasting Inc. to modify the facilities of WCBS-TV, New York, NY (BPCDT-20080523AEI), located on the Empire State Building ("ESB"), to specify effective radiated power (ERP) of 426 kW.

Specifically, Meredith agrees to accept predicted new interference to 3.27 percent of the service area population of WFSB's currently licensed operation (BLCDT-20041029AIL), and 2.41 percent of the service area population of the currently unbuilt WFSB operation authorized by construction permit (BPCDT-20080619AFT).

Meredith also does not object to the grant of CBS's contemplated amendment of its pending application (BMPCDT-20080619AAZ) to specify non-directional ERP from its proposed operation from the Freedom Tower (immediately adjacent to the former site of the World Trade Center), so long as such amended application will not cause predicted new interference to the service area population of WFSB's currently licensed directional operation (BLCDT-20041029AIL) or its authorized non-directional operation (BPCDT-20080619AFT) in excess of the percentages specified for each in the preceding paragraph.

Sincerely,

A handwritten signature in dark ink, appearing to read 'P. K. W.', written over the printed name.

Paul Karpowicz
