

Request for Extension of Special Temporary Authorization

Cumulus Licensing LLC (“CLL”), pursuant to Section 73.1635 of the FCC’s rules, hereby requests that the initial special temporary authorization (“STA”) for radio station KQIZ-FM, Amarillo, Texas (Facility ID 41567) (File No. BSTA-20130805ADG, as extended, *inter alia*, by File No. BESTA-20160823AAB), be extended for an additional 180 days.

Station KQIZ-FM is licensed to operate on Channel 226 with 100 kW effective radiated power at 213 meters height above average terrain. Prior to the filing of its initial STA request, KQIZ-FM had been operating with a 35-year-old McMartin BF-25k transmitter. That transmitter failed and no longer is capable of operating at full power. CLL has been operating KQIZ-FM at approximately 30% of its licensed power while it tries to find replacement parts for the transmitter. The transmitter manufacturer is no longer in business. CLL currently is waiting on the availability of parts to rebuild the Continental transmitter. CLL also is hampered by the fact the engineer for the Amarillo market recently had eye surgery and will be unable to work for the next six to eight weeks.

For the reasons stated herein, CLL respectfully requests a further extension of the existing STA for a period of 180 days pursuant to Section 73.1635 of the Commission’s rules to continue to operate KQIZ-FM at reduced power. The requested extension will serve the public interest because it will enable the station to continue to serve the residents of Amarillo and the immediate surrounding area until CLL can return the station to full licensed power.
