ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of FOX TELEVISION STATIONS, INC., licensee of WTTG-DT, Channel 36 in Washington, D.C., in support of its Application for Construction Permit to operate with its post-transition DTV facility.

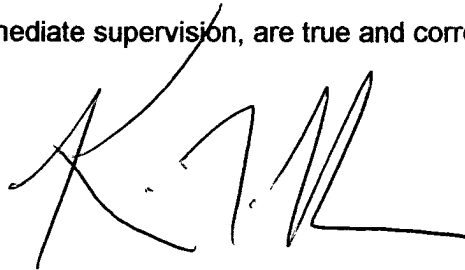

It is intended to utilize the presently licensed WTTG-DT antenna, mounted at the 191-meter level of the 215-meter tower. Exhibit B provides antenna elevation pattern data and proposed operating parameters are tabulated in Exhibit C. Exhibit D is a map upon which the predicted service contours are plotted. As shown, the city of license is completely contained within the proposed 48 dBu service contour. It is important to note that the proposed 41 dBu contour is virtually identical to that allotted to WTTG-DT in Appendix B of the Commission's DTV Table of Allotments. Since the proposed contour is completely contained within that allotted to WTTG-DT, no interference study is required. A power density calculation is provided Exhibit E.

It is not expected that the proposed facility would cause objectionable interference to any other broadcast or non-broadcast station authorized to operate at or near the WTTG-DT site. However, if such should occur, the owner of WTTG-DT recognizes its obligation to take whatever corrective actions are necessary.

Since no change in the overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued Antenna Structure Registration Number 1042983 to this tower.

EXHIBIT A

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

A handwritten signature in black ink, appearing to read 'K. T. Fisher', with a large, sweeping flourish extending from the end of the signature.
