**Exhibit 12 Page 4**  
**Community Public Radio, Inc.**  
**Interference Area to KQXT-FM**  
**San Antonio, Texas**

The Proposed translator is within the 60 dBμ contour of lower second adjacent station KQXT-FM channel 270. The KQXT-FM licensed (BLH-20070817ACA) contour at the translator site is 86.5 dBμ F(50,50). Using the ratio of 100:1 (translator to KQXT-FM) on the second adjacent channel, the population within the proposed translator 126.5 dBμ F(50,10) contour is zero. Using the free space equation, the predicted interference area for KQXT-FM is expected to extend 36 meters from the antenna. The antenna is 70 meters above ground level. As can be seen in Exhibit 12 Figures 2 and 3, a topographic map, and an aerial photograph have been provided that show the Proposed site. These figures indicate that there are no structures or elevated roadways within the 36 meter interference area of the translator.

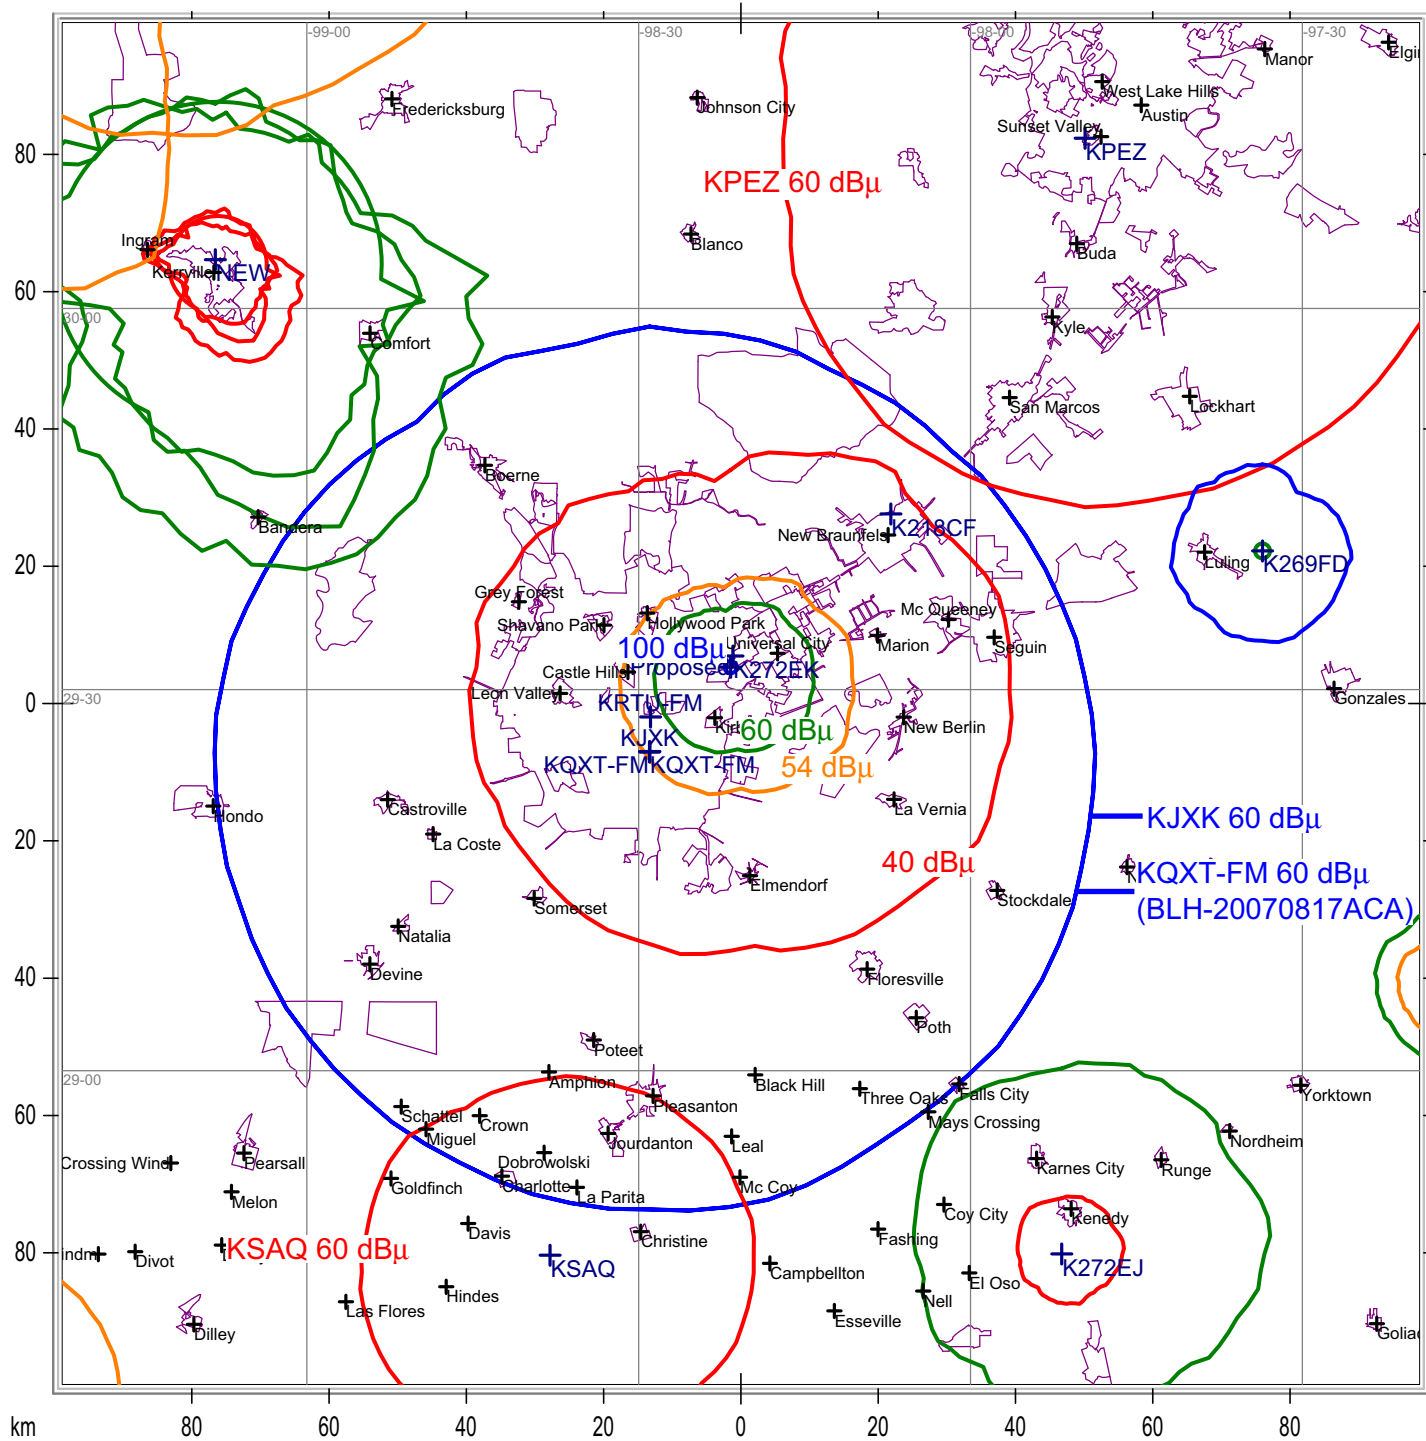

Therefore, the application is in compliance with the following: §74.1204 (d) "The provisions of this section concerning prohibited overlap will not apply where the area of such overlap lies entirely over water. In addition, an application otherwise precluded by this section will be accepted if it can be demonstrated that no actual interference will occur due to intervening terrain, lack of population or such other factors as may be applicable."

**Exhibit 12 Page 5**  
**Community Public Radio, Inc.**  
**Interference Area to KJXX**  
**San Antonio, Texas**

The Proposed translator is within the 60 dBu contour of upper second adjacent station KJXX channel 274. The KJXX contour at the translator site is 86.5 dBu F(50,50). Using the ratio of 100:1 (translator to KJXX) on the second adjacent channel, the population within the proposed translator 126.5 dBu F(50,10) contour is zero. Using the free space equation, the predicted interference area for KJXX is expected to extend 36 meters from the antenna. The antenna is 70 meters above ground level. As can be seen in Exhibit 12 Figures 2 and 3, a topographic map, and an aerial photograph have been provided that show the Proposed site. These figures indicate that there are no structures or elevated roadways within the 36 meter interference area of the translator.

Therefore, the application is in compliance with the following: §74.1204 (d) "The provisions of this section concerning prohibited overlap will not apply where the area of such overlap lies entirely over water. In addition, an application otherwise precluded by this section will be accepted if it can be demonstrated that no actual interference will occur due to intervening terrain, lack of population or such other factors as may be applicable."
