## Tower Search

Please allow up to a minute for the map to appear. The map will show all antenna structures that are registered with the FCC about 10km around the search location. A green icon indicates a location the number of LPFM channels that are available without a waiver. A yellow icon indicates that only second adjacent channel waiver channels are available. Red indicates no channels available. The black icon is your current search location. Clicking on a map icon will show the distance from your current point to the icon location, the available channels (green channels are without a waiver and yellow channels require a waiver) as well as the name of the tower's owner along with a phone number and e-mail address. Click on the "Move search here" link to refocus the search to this location. Please note that a listing of a tower on myLPFM does not mean that the owner of the tower will rent space to anyone and the display of towers on this map does not constitute an endorsement by REC of any tower company's services.

## Nearby Airport

BISHOP INTL

To check to see if FAA notification is required, use the [Site Details] button to enter the tower information and then click on the [TOWAIR] button to access the FCC's TOWAIR tool.

Location is approximately 91.4 km from the Canadian border. All assignments in this area are coordinated with the Canadian Government.

## Nearby AM Station:

This location may be close to one or more AM broadcast stations that may require coordination by the LPFM applicant in compliance with Part 1, Subpart AA of the FCC rules. To determine whether notification of nearby AM stations may be required, click on [Site Info] and enter your proposed antenna details and then click on [Nearby AM] to measure distances and electrical heights.

## Available Channels for LPFM

Channels in this section meet minimum spacing requirements of §73.807 of the FCC rules and may be filed without a waiver.

96.7

Channel Report

Interference

Ch. 244

Channel may receive interference from other stations.
