Exhibit 12-3

Minor Changes to Short Form Application

7/21/2003

Pursuant to Public Notice DA 03-2095, applicants may change the technical proposals specified in their previous auction window short form filing as long as such changes do not constitute major changes or cause new mutual exclusivities. 47 C.F.R. § 74.1233(a)(1) reads, "a major change is any change in frequency (output channel) except changes to first, second or third adjacent channels, or intermediate frequency channels, and any change in antenna location where the station would not continue to provide 1 mV/m service to some portion of its previously authorized 1 mV/m service area." The changes specified in this proposal are a change to the upper first adjacent channel (which does not cause any new mutual exclusivity, SEE Exhibit 12-1) and a relocation that will provide 1 mV/m service to a portion of the original short form filing (See map below.) therefore, these changes are minor.
