

Exhibit 8
Engineering Statement in support of an Minor Change
to a Licensed facility – BLTTL-20011213ABF
Dean Mosely, Jacksonville, FL Ch 27

BACKGROUND

Applicant has a License on Ch 27. This application is to change the tower location and increase the ERP.

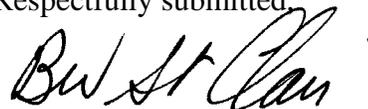

Additional Interference Considerations

Interference to the following stations was studied using “Population Loss Studies” based on the “Longley-Rice Terrain Algorithm” in accordance with OET Bul 69.¹

BLCT-20000804AAT, WRDQ, Ch 27, Orlando, FL
BLCT-19990510KE, WTXL-TV, Ch 27, Tallahassee, FL
BPCDT-19991101AFM, WTGS, Ch 27, Hardeeville, SC
BLCT-20030328ANT, WAWS, Ch 30, Jacksonville, FL
BPTTL-20021003ABC, W08DM, Ch 27, Gainesville, FL

Population loss less than 0.5%

Respectfully submitted,

B. W. St. Clair
Engineering Consultant
March 31, 2006

¹ The analysis was performed on a Sun “Blade” computer using the exact replica of the FCC program. Population losses of less than 5% are not reported in detail. Only an indication of no interference is shown.
