

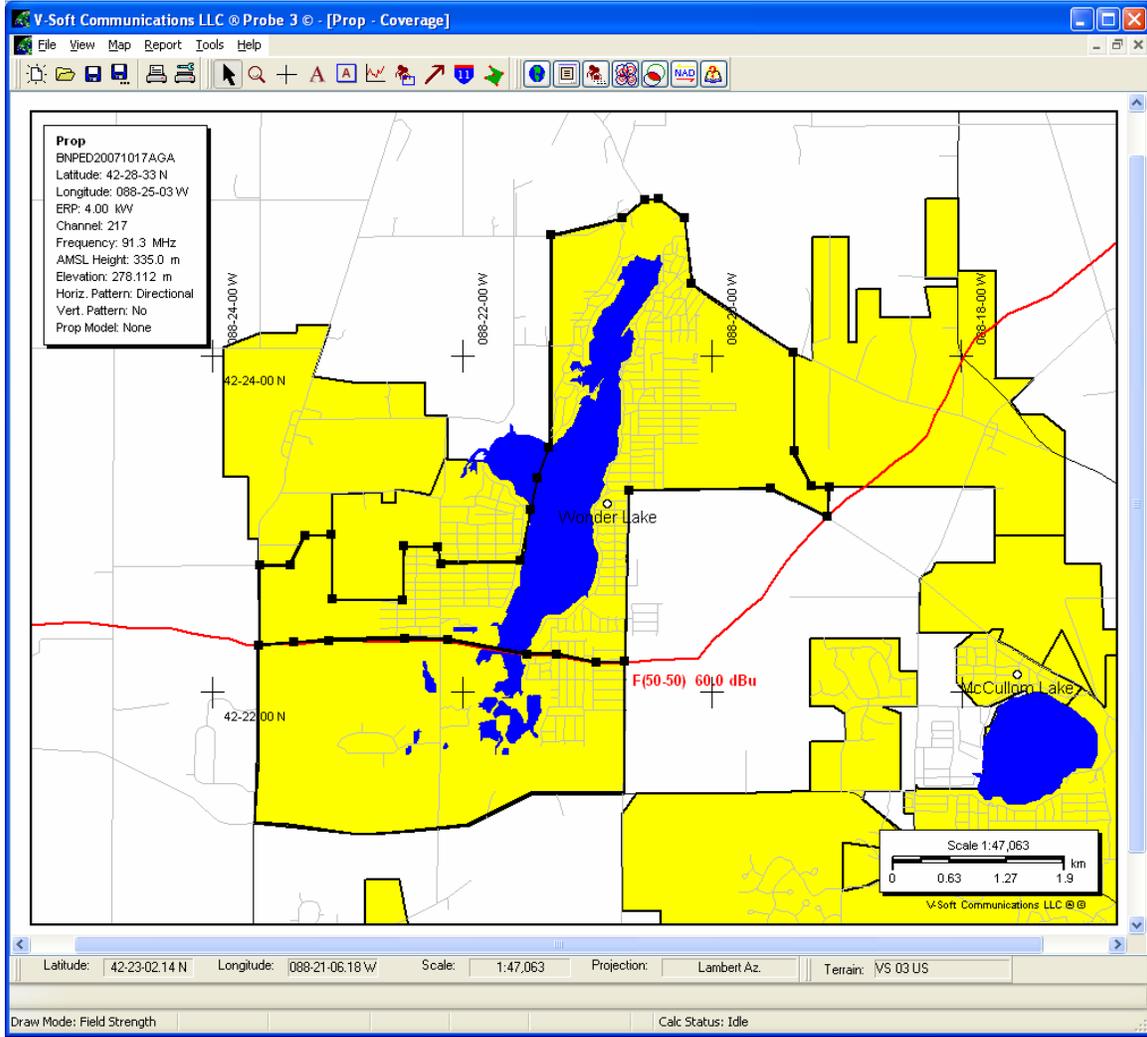

## Exhibit 14

### Community Coverage

The attached map shows the 60 dBu contour of the proposed station and the census 2000 city boundaries. Polygons are drawn for the inside and outside areas. For over 50% of the area and over 50% of the population to be inside the city, the inside needs to be greater than the outside in both cases.

## Inside Polygon:

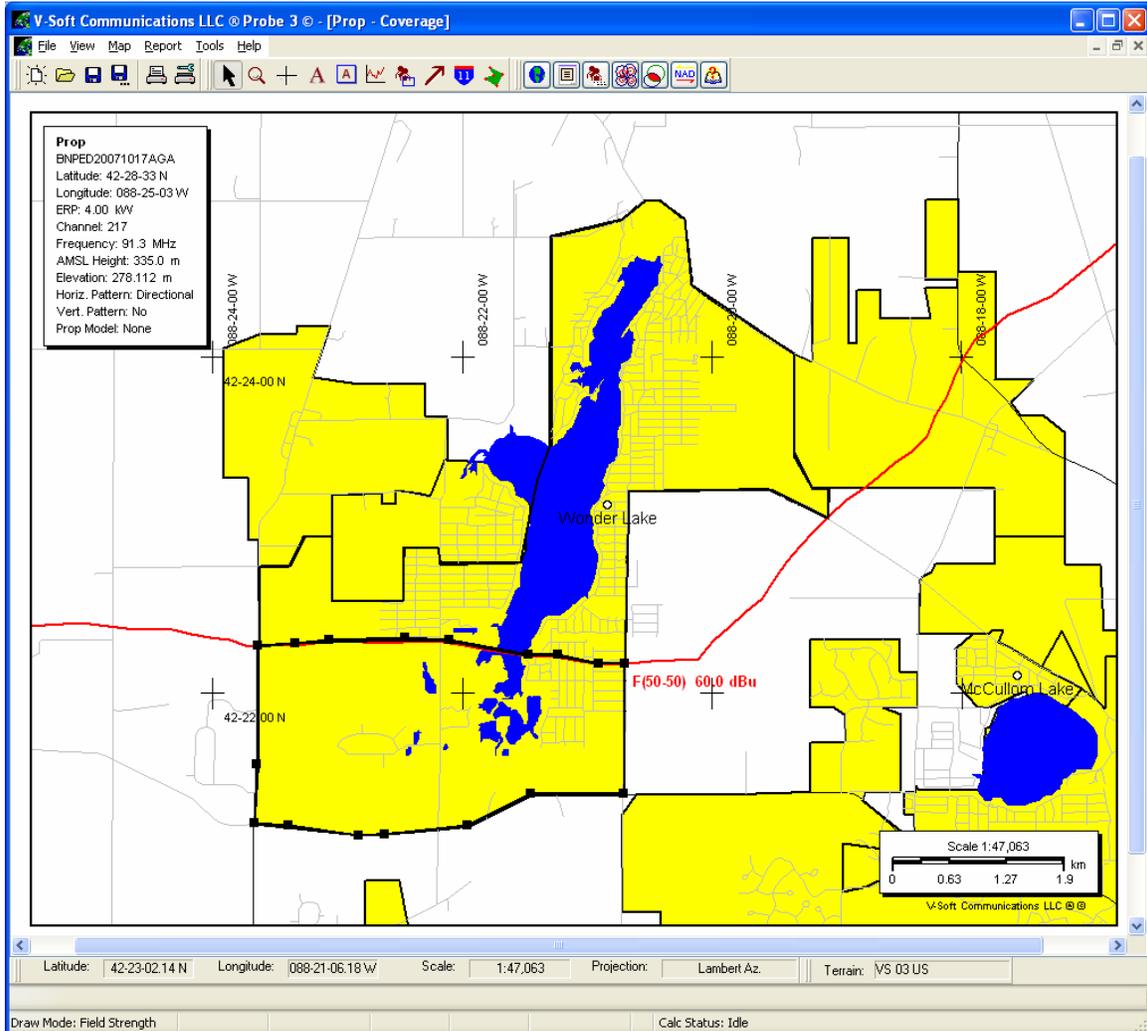

### Polygon Population Report

Population Database: 2000 US Census (SF1)

Total Population: 5,840  
Housing Units: 2,425  
Polygon Area: 11.43 sq. km

## Outside Polygon:

### Polygon Population Report

Population Database: 2000 US Census (SF1)

Total Population: 1,623  
Housing Units: 572  
Polygon Area: 7.6 sq. km

### Summary:

Population: Inside (5840) > Outside (1623)

Area: Inside(11.43 km<sup>2</sup>) > Outside (7.6 km<sup>2</sup>)

The 50% condition is amply satisfied.
