

**STATEMENT REGARDING MULTIPLE OWNERSHIP**

Wilks License Co., LLC ("Wilks") seeks to acquire herein from KJUL License, LLC radio broadcast stations WRNO-FM, New Orleans, Louisiana and KMEZ(FM), Belle Chasse, Louisiana. Wilks also intends to shortly file applications on FCC Form 314 seeking Commission consent to acquire radio broadcast stations WSJZ(FM), Reserve, Louisiana and WYLA(FM), Lacombe, Louisiana from Styles Broadcasting of New Orleans, L.L.C. and Styles Broadcasting of Louisiana, Inc., respectively.

The attached duopoly map prepared by Dataworld shows the principal community contours of each of the above-mentioned stations. As can be seen from the map, the acquisition of stations WRNO-FM, KMEZ(FM), WSJZ(FM) and WYLA(FM) creates three "radio markets" for purposes of the Commission's multiple ownership rules. As demonstrated below, common ownership of all of the above-mentioned stations is in full compliance with the Commission's multiple ownership regulations. See 47 C.F.R. § 73.3555(a).

**I. Radio Market One: WRNO-FM and KMEZ(FM)**

The first radio market is defined by the principal community contours of radio broadcast stations WRNO-FM and KMEZ(FM). Common ownership of WRNO-FM and KMEZ(FM) by KJUL License, LLC has previously been approved by the Commission, and these stations are also currently under common ownership in compliance with Section 73.3555(a) of the Commission's regulations.

Pursuant to Section 73.3555(a)(1)(iv) of the Commission's multiple ownership rules, in even the smallest radio markets, a party may own, operate, or control up to five commercial radio stations, not more than three of which are in the same service (AM or FM), except that a party may not own, operate, or control more than 50 percent of the stations in such market. As demonstrated in the attached Dataworld map and duopoly study, there are nearly 40 commercial radio stations whose principal community contours overlap the composite contours of WRNO-FM and KMEZ(FM). Accordingly, as there are well over four stations in the market, the acquisition of WRNO-FM and KMEZ(FM) is in full compliance with the radio duopoly rule.

**II. Radio Market Two: WRNO-FM and WSJZ(FM)**

The second radio market is defined by the principal community contours of radio broadcast stations WRNO-FM and WSJZ(FM). Pursuant to Section 73.3555(a)(1)(iv) of the Commission's multiple ownership rules, in even the smallest radio markets, a party may own, operate, or control up to five commercial radio stations, not more than three of which are in the same service (AM or FM), except that a party may not own, operate, or

control more than 50 percent of the stations in such market. As demonstrated in the attached Dataworld map and duopoly study, there are over 40 commercial radio stations whose principal community contours overlap the composite contours of WRNO-FM and WSJZ(FM). Accordingly, as there are well over four stations in the market, the acquisition of WRNO-FM and WSJZ(FM) is in full compliance with the radio duopoly rule.

**III. Radio Market Three: WRNO-FM and WYLA(FM)**

The third radio market is defined by the principal community contours of radio broadcast stations WRNO-FM and WYLA(FM). Pursuant to Section 73.3555(a)(1)(iv) of the Commission's multiple ownership rules, in even the smallest radio markets, a party may own, operate, or control up to five commercial radio stations, not more than three of which are in the same service (AM or FM), except that a party may not own, operate, or control more than 50 percent of the stations in such market. As demonstrated in the attached Dataworld map and duopoly study, there are nearly 40 commercial radio stations whose principal community contours overlap the composite contours of WRNO-FM and WYLA(FM). Accordingly, as there are well over four stations in the market, the acquisition of WRNO-FM and WYLA(FM) is in full compliance with the radio duopoly rule.
