

**Affidavit**

Pursuant to 47 C.F.R. Section 73.3573 note 4, this is to certify that no other channels are available to allocate KARS (Laramie, WY) as a class C. Since there are no other available channels for a class C serving Laramie, WY and KARS does not meet the minimum HAAT restriction of 451 meters for a class C, KARS should show cause why it should not be reclassified as a class C0. KARS presently operates with a HAAT of 372 meters.
